Petition to Ohio Power Siting Board re: 16-253-GA-BTX

Citizens of Southwest Ohio have vehemently opposed Duke's plans to build a high pressure pipeline through our densely populated communities for almost 2 years. We were deeply concerned to learn that 1 1/2 years after its initial filing, Duke realized it failed to identify a significant environmental issue with one of the proposed routes. Information about this issue was known and could have easily been discovered had Duke utilized the appropriate level of diligence. OPSB staff, who had a duty to evaluate Duke's application with a critical eye, did not identify the significant environmental issue.

This has left the citizen confidence in both Duke's application and OPSB's review deeply shaken. Many are not convinced that Duke has demonstrated a pipeline of this size and scale is needed, nor do they believe Duke's routing decisions are prudent or fair. These same citizens bear the financial burden and risk of having Duke's high pressure pipeline near their homes, schools, businesses and places of worship for decades.

It is with this understanding that the undersigned respectfully request the following:

1. OPSB staff conduct a critical and thorough review of Duke's entire application and supplements for both completeness and accuracy.
2. Citizens be given the opportunity to ask questions and express concerns via another information meeting and public hearing. Citizens also request that decision makers from OPSB be present during the public hearing.
3. Citizens be given adequate time to understand the supplemental materials and the original materials in light of Duke's significant changes to the application.

Consumer Service Division
Memorandum

CASE ID: 00205896

COMPANY:

CUSTOMER: Richard Tremblay

ADDRESS:

SERVICE ADDRESS:

AIQ: Duke Energy Ohio

NIQ: (513) 891-0378

DOCKETING CASE #:16-0253

SUBJECT: Duke Energy Ohio - Pipeline

I am absolutely appalled that a large high pressure natural gas pipeline is under consideration through a highly populated area in the northeast section of suburban Cincinnati. I have yet to see information truly justifying the need for this pipeline. Therefore, everything points to this pipeline being a transmission pipeline and not a distribution pipeline. Besides the potential safety issues, there will be a huge disruption to several 100,000 commuters, residents and businesses throughout the installation process. There has to be a safer and less disruptive system to meet Duke's natural gas needs. Thank you for your consideration. Rick Tremblay
