**Subject:** Seneca Wind project Seneca County Ohio

I am a property owner that will be affected by this project and would like to ask you to DENY this project.

I'm not sure what you will be basing your decision on but I hope you will take the local property owners' opinions into consideration.

Please consider this project as if it was being built next to property that you personally own. Between the noise and the ugly turbines, your property will lose value or even be unsellable.

There are reasons people move to the country and one of them is to enjoy the peace of nature, not the noise wind turbines. We want to see nature, not ugly "fans" at every turn.

We accept slow internet speeds and poor cellular connections because we want to be away from the noise of the "city". Please don't condemn us to this unnecessary infringement on our property.

Dawn Nord

COMPANY\_NAME: S wind

CASE\_NUMBER: 18-0488-EL-BGN

COMMENTS: To whom this may concern;

I am writing this email as a formal complaint of the company S wind, who has proposed a wind turbine project in Seneca County. My husband and I attended their meeting on April 17, 2018; with many of our friends and neighbors, it looked like the county fair except there was no laughing or smiling. We were all there seeking answers and information concerning our county. We had to wait in a long line to even get into the building, and spoke to friends who were leaving and told us to not get in a hurry because they did not learn a thing. After we finally got into the room, people were crowded around these blown up maps but the maps were very deceptive. I say this because I have lived in Seneca County my entire life and I had trouble making out landmarks and figuring out what was where. My husband had to help me decipher or try to figure out the very vague maps, and where the turbines were going. Finally a man grabbed a microphone and said there will not be a presentation...people just stood there dumbfounded...it slowly started to sink in that we were not getting any information about these massive turbines. We left thinking that we're hiding something and then on April 30th we receive this packet in the mail from S wind. What do you know... a more detailed map with more turbines on them and a question-answer packet "let's be friends" pages. Very shady indeed, I will be writing to all my state representatives and county commissioners, this company makes me as nervous as those massive turbines...to say the least.

Thank you for your time,  
Laurie A. Shellhouse  
Life long Seneca County Resident

COMMENTS: In regards to the proposed site for a wind turbine in relation to my home. Is it really nessasary to place a wind turbine practically in my front yard? Ask yourself Would you want that? People work hard their whole life to have a home and pride in keeping it up, looking nice. And than bam some company comes along and changes it all. This is really and truly a life changing event for us. We made the choice to live and work in our little piece of this world for a reason which was because we like the quiet country life, the unobstructed views of the sky and watching sun rises and sun sets without having to look around a 600 ft. Tall piece of machinery, it's our home, if we wanted technology and modernization on a larger scale we would of choose to live in a metro environment like Columbus or Cleveland. If the farmers want it on their property than choose a farmer that has property suitable for a turbine in his front yard. Not mine. I urge your support in understanding our concern. Thank you for the opportunity to speak my views on wind turbines
