Ohio Power Siting Board,

4/30/18

We are very concerned with the wind turbines coming up in Seneca County Ohio. My home sits in the middle of all those turbines. This situation makes me depressed. We built our home on my grandfathers land. We love it here and want to retire in a few years. I was born and raised a country girl. The outdoors is my heaven. I was looking forward to sitting in my yard drinking my morning coffee and watching the sunrise, also, I love the sun set. The moon, stars, sunrise and sunsets are a part of my life that keeps me smiling. The sad part is now I will be surrounded with wind turbines invading my beautiful outdoors.

I went to visit the wind turbine in Harspter Oh., it was a windy day, we were shocked at how loud it was. It did sound like an airplane ready for take off. We have a nice piece of property and love it here. The value of our home would go down tremendously. I studied shadow flicker on youtube, it was not pleasant. I also suffer migraine headaches, the flickering will set them off. No one in our neighborhood wants these turbines except the ones making money from them. The farmers who are leasing their land don't even live around here. How nice for them. Our feeling are that we were swept away in this deal and we have no one to help us get out of it. Us land owners who have these monsters looming over us have no control what happens to us or our property. I feel beat down by the system. We should have some say in what happens around us and what we have to put up with. Studies show, these turbines do make people sick. I have studied up on those too.

Please help the people in Seneca County to keep their way of life.

Sincerely,

Joyce Ziegler *Joyce Ziegler*
