Case No. 17-1944-GA-BNR**

CASE NO. 17-1944-GA-BNR
PIR 620 SOUTHWAY STREET AND PERRY DRIVE
PERRY TOWNSHIP, STARK COUNTRY, OHIO
PIPELINE REPLACEMENT PROJECT

The following information is being provided in compliance with Condition No. 6 of the October 6, 2017 Ohio Power Siting Board (“OPSB”) Staff Report of Investigation, and as agreed to by Dominion Energy Ohio’s (“DEO”) Supplement to Construction Notice filed October 11, 2017.

Condition No. 6 states:

Prior to construction, the Applicant shall submit to Staff, for review and confirmation that it complies with this condition, a project construction plan. The specific locations of its laydown areas and is responsive to ODNR concerns about state listed species and ecological areas of significance. If the specific laydown locations chosen appear to have additional adverse impacts, the Applicant shall either propose different specific locations without such impacts, or refile its application.

DEO has now selected its construction contractor, Don Wartko Construction (“Wartko”). Wartko has secured a staging area for PIR 620 at the southwest corner of Southway Street and Perry Drive located in Perry Township, Stark County, Ohio as shown on the map below.

CASE NO. 17-1944-GA-BNR
PIR 620 SOUTHWAY STREET AND PERRY DRIVE
PERRY TOWNSHIP, STARK COUNTY, OHIO
PIPELINE REPLACEMENT PROJECT

The lot is paved and has no environmental resources of concern. One inlet is located along Perry Drive south of the yard. If the stockpiles of fill and trench spoils are close enough to the inlet or has an opportunity to get washed into it, the contractor will be required to protect it with filter sock or silt fence.

Daily, and as needed, street cleaning will also likely be needed to prevent sediment tracking onto the roads. As long as typical best management practices (“BMPs”) (street cleaning, gravel topdressing and sediment control devices) are utilized, no environmental issues are expected.
