DOCKETING CASE #: 15-1830-EL-AIR

SUBJECT: Dayton Power and Light Co - Protest Rate Case

Please docket the comments in the case number above:

I think it's ridiculous that an electric company need to increase the delivery charge so high where it is hard for people to keep up by paying their bills. It hurts us financially and takes a toll on us. All I have to say is, "Corporation Greed" where they don't care about anyone but themselves. It got to stop.

NIQ:

I oppose the rate hike. Things are too high already. Dp&L doesn't remove the gym shoes off power lines making it look more drug infested.

SUBJECT: Dayton Power and Light Co - Rates & Tariffs

Please docket the customers comments in the case number above.

Caller saw the information on news about company increasing rates, caller would like it documented that he is against it and would like for the PUCO to not approve.

As a senior citizen and on a fixed income I am opposed to this new increase since it is not based on usage and will affect every one that receives electric from the DP&L distribution system. It upsets me that they should be allowed to impose rate increases not based on actual usage!

I fully understand DP&L has the right to request rate increases but what is not clear is DP&Ls request for such a huge rate increase. The people need to understand why such a rate increase would be justified. Rate to operate should be decreasing with all the automation that has been developed and implemented. CoSt for technology has drastically decreased over the last two decades. Manufacturing cost are very stable and with the majority of operation has been automated it is unclear why DP&L can justify such a huge increase.

I think because of such a request DP&L justification for such an operation increase needs further investigation
