Comment:

It would be really nice if you would stand with the little guy for a change instead of big business. If we provide solar power to our electric company, they should pay us the same amount for our energy as we have to pay them for theirs. In addition to energy, we should also be compensated for capacity. And if we have credits at the end of the year, we should be compensated for them rather than just rolling them over year after year. We invested in our solar systems just the same as the electric companies have. We deserve to be compensated equally!
