Subject: LEEDco project

Hello,

I am a resident of North Olmsted, and I encourage you to support the LEEDco wind turbine project. Wind energy is cleaner, and can never run out. The air quality in the Cleveland area is terrible, earning an F rating from the American Lung Association. Bringing clean energy like wind into Ohio is not only good for the environment and public health--but will be great for the economy. Ohio has so much untapped wind potential! I'm 21 years old, and I fear that my future will be grim because of all the environmental destruction. Who knows if I'll have clean air to breathe, water to drink, and a good quality of life 50 years from now?

Please take action to preserve the future of young people like me

Thanks,

Gracie Brett
