

Mandy Kelley

As a fourth generation resident of Seneca County, I have a vested interest in protecting our health, safety, and well-being. We are blessed to live in a beautiful, peaceful place. The wind industry has already assaulted our community with lies and divisiveness. Our property values, which already suffer, are in very real danger with the threat of unsafe setbacks. Our already struggling economy will see very little real benefit, as Big Wind will reap nearly all the benefits. It is a proven fact that little power will actually be generated in our county. The reality is, it's generally just not very windy here!!! Monies set aside for decommissioning of these turbines comes nowhere close to the actual cost of tearing them down. This means ultimately we leave a tremendous burden on our children to deal with the mess left by big wind long after they have skipped off to the bank. We owe it to ourselves, our neighbors, and our children to fight for our health, safety, and well being. I plead with you to do the same.
