Subject: Wind Turbine Setbacks Sub HB-114

To Whom it May Concern,

I am writing to you hoping to let you see the wind turbines from my perspective. Please consider what it would be like to see a 591 foot eyesore from your back yard. Right now I see open fields, woods, deer, hawks, Canada geese, blue herons, bald eagles and many other birds and animals. We love to go outside and listen to the birds and watch the wildlife. At night we love to watch the sky. If these turbines are between our yard and the wetlands behind our house what would it do the wildlife my husband and I love to watch? What would it do to our peace and quiet? What about our quality of life and health? Our investment in our home?

I also worry about safety. If the turbines are placed closer, my concern is ice throw and debris from the blades. I have seen blades broken on wind turbines. How far does the debris fly when a blade breaks? I firmly believe the farther the turbines are from property lines and houses the better for many reasons. Safety, noise, blade flash, shadow flicker, flashing lights and health.

Please consider our concerns.

Thank you,

Norman and Susie Wurm
