Subject: 18-0488 - Proposed turbine location

Now that the detailed design plans are available online, turbine #85 is located too close to my property line per the current setback rules and the scale provided in the legend. This is not legal.

I am a resident of seneca county, A tax paying voter of ohio, and i oppose the seneca wind farm llc (case number 18-0488-EL-BGN) project. I have educated myself on the issue and have come to the conclusion that the project will have a lasting negative effect on me, my family, and my community for generations. the cost to our community outweighs any speculative benefits. Seneca county is part of scenic ohio and not an industrial zone. I ask that you do not approve this or any industrial wind project in ohio, until the growing health,safety,and trespass zoning issue associated with industrial wind projects are properly addressed. This project and any industrial wind project should be subject to all local township laws before approval. I have chosen to stand with the growing majority in seneca county against these invasive industrial wind projects
