Subject: Case # 16-1871-EL-BGN..... Icebreaker Wind Support

OPSB:

I have already previously submitted detailed written support of the above referenced Case # 16-1871-EL-BGN..... Icebreaker Wind, as well as having given verbal testimony at one of your public hearings in Cleveland. I'm a life long N.Ohio resident, fisherman and hunter including on Lake Erie, professional electrical engineer in OH, and a certified energy manager. In addition, I work in downtown Cleveland with a daily view of the lake and the proposed demonstration project. This project needs to finally get approved for the following reasons:

- Install the demonstration project so we can clearly see all performance and environmental issues and decide if a further build out is wanted
- Install the demonstration project to allow the City of Cleveland to be viewed as a modern city with cool things like off shore wind turbines and continue to retain and attract young professionals and their families to N. OH
- Install the demonstration project to produce jobs and if a build out becomes viable further jobs and new industry leadership in our region
- Do not restrict hours of operation or it will kill the project
- Do not put no kill shutdown regulations on the project that will kill the project

Let's move on with this great project and opportunity already!!!!

Please approve Case # 16-1871-EL-BGN..... Icebreaker Wind (and with minimal restrictions)

Thanks

Martin F. Ellman, P.E. CEM, DGCP
