Ohio Sitting Board

I write to you in support of the
Ice Breaker Turbine Project out in Lake
Erie. case # 6-1871-EL BGN Ice Breaker
Wind.

We need clean wind energy so we
don't add to future pollution that coal
plants will. It's innovative + creates 500
jobs. Wind turbines killing birds + bats, in
a year is equivalent to those killed by
2 cats. Mercury from coal plants kills
cats + bats also.

Lets hold our health above protesters
who like birds, they say, but they really
love their profits from coal. How
transparent!

Sincerely
Brian Taylor

OH Power Sitting Board

I am writing in support of
The Icebreaker six turbine wind
demonstration project to be built 8 miles
off downtown Cleveland's Lake Erie
Shoreline

Case # 16-1871-EL-B&N
Icebreaker Wind

We need it for clean energy, to reduce
the pollution in the air that comes
from coal powered energy plants.

It is innovative. Will create jobs
and will not harm any more birds
in one year than two cats. Mercury
from coal burning plants harms
birds now.

We need this to improve air
quality and the health of residents.
Sincerely

Justine Smith
