**Subject:** Fwd: SAWU S-Power Maps, EXCESSIVE SOUND LEVELS in Seneca Wind LLC including Seneca East School!!!

**Dear Friends of SAWU**

**WHO (World Health Organization) recommendations have just come out regarding safe sound levels from wind turbines (see attached). According to S-Power's own maps on the**

**OPSB (Ohio Power Siting Board) the sound level at Seneca East Schools and hundreds of homes will be above safe levels. Please email Seneca County Commissioners concerning this. Ask Ms. Stacy " What about the children, we are not making this stuff up!!!"**

**It is an outrage that Shayne Thomas and Holly Stacy are spending over \$100,000+++ to intervene FOR these wind projects when residents and school children will be subjected to harmful sound levels.**

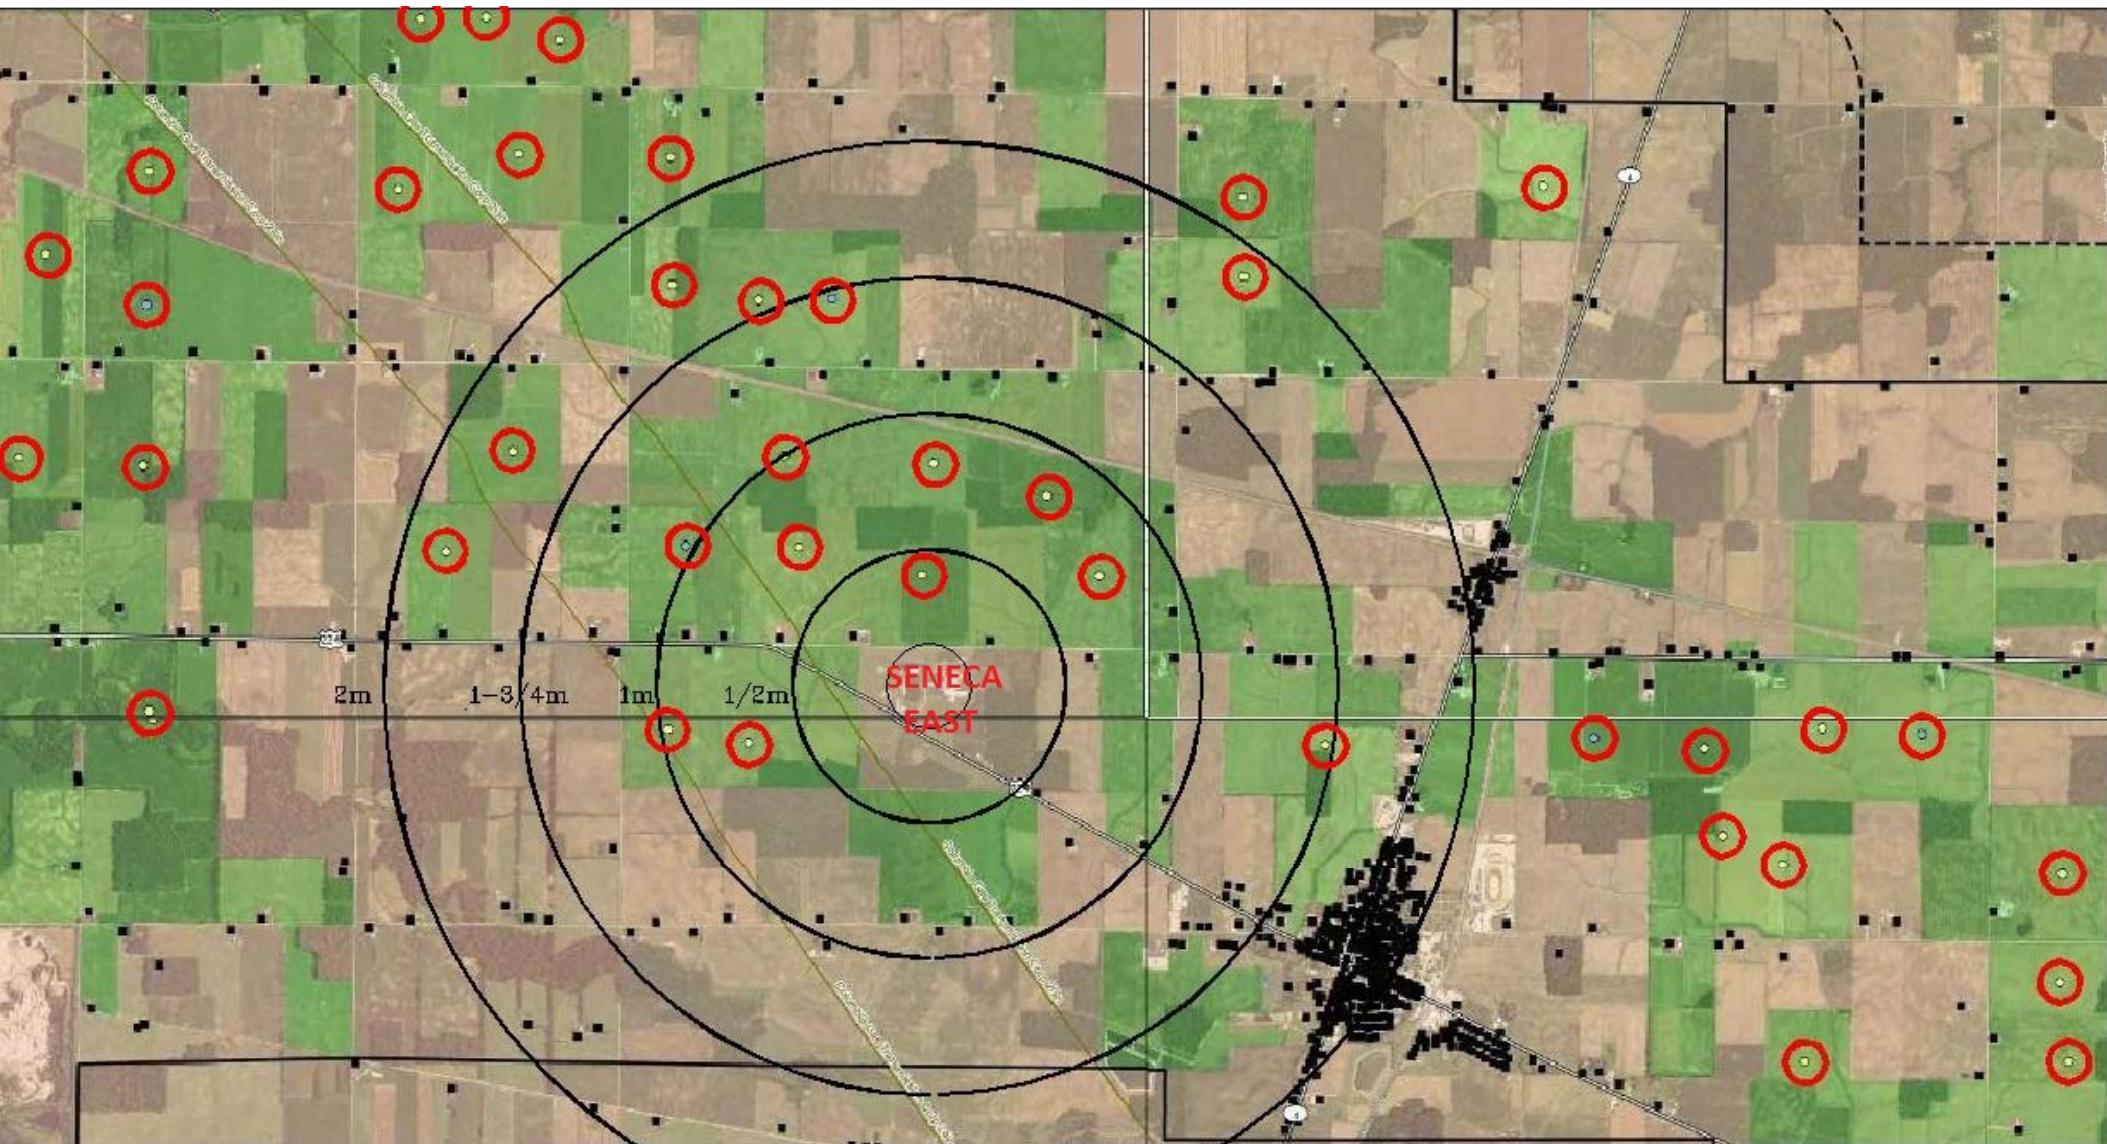

## 3.4 Wind turbine noise

### Recommendations

For average noise exposure, the GDG **conditionally** recommends reducing noise levels produced by wind turbines below **45 dB  $L_{den}$** , as wind turbine noise above this level is associated with adverse health effects.

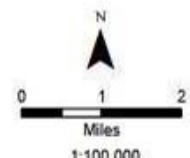

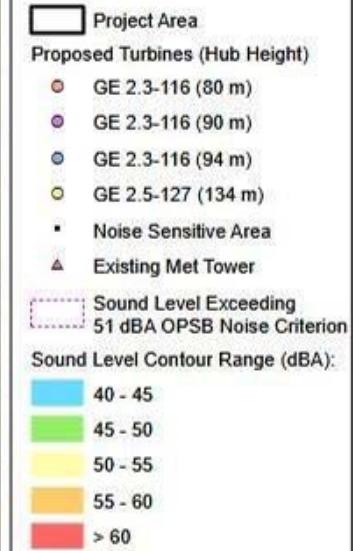

To reduce health effects, the GDG **conditionally** recommends that policy-makers implement suitable measures to reduce noise exposure from wind turbines in the population exposed to levels above the guideline values for average noise exposure. No evidence is available, however, to facilitate the recommendation of one particular type of intervention over another.

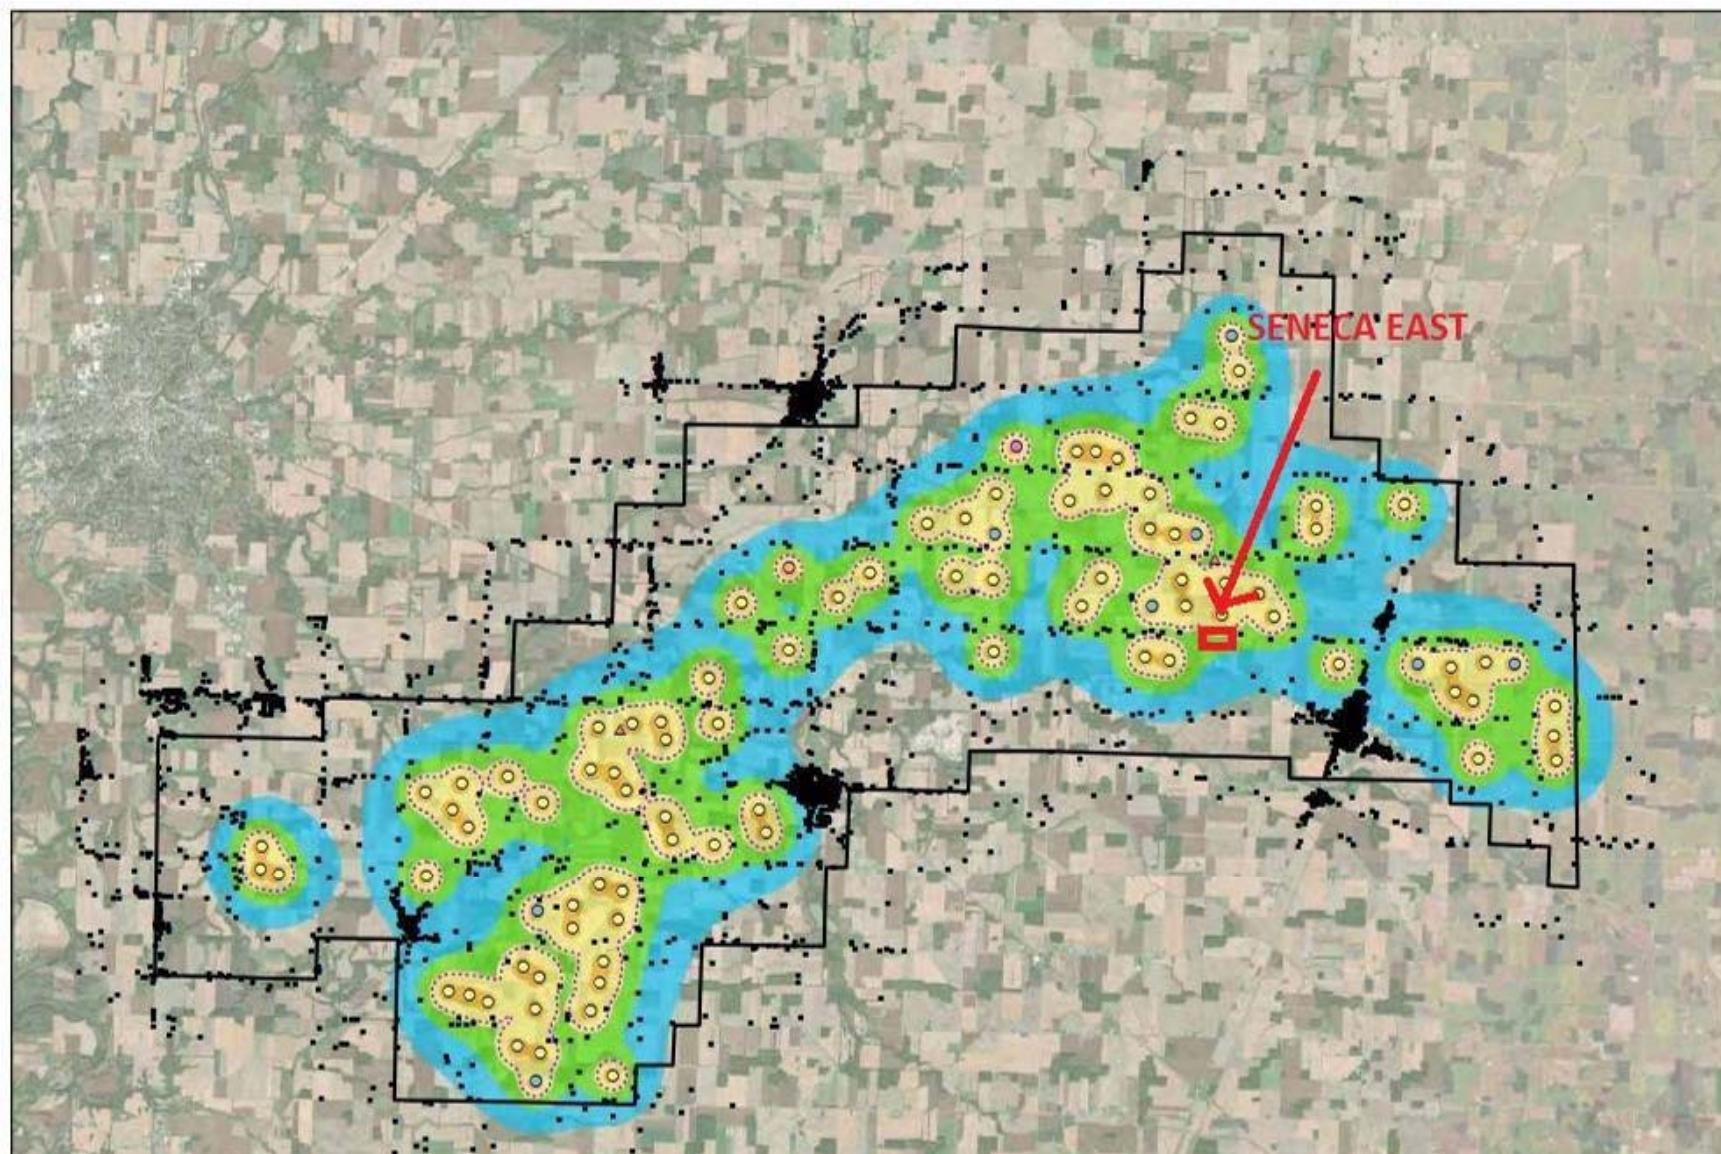

Revised Figure 08-1a  
Received Sound Levels: Wind  
Turbines at Critical Wind  
Speed - GE Scenario
