**RE: PUCO Case No. 18-1259-EL-BTX  
West Milton-Eldean 138 kV Transmission Line Project  
Proofs of Publication – O.A.C 4906-3-03(B)(1) Notice in Newspaper Regarding the  
Public Information Open House**

Dear Chairman Haque,

The Dayton Power and Light Company (DP&L) files the attached proofs of publication of public notices concerning the proposed major utility facility in the above-referenced case. The public notices were published October 21, 2018, pursuant to Rule 4906-3-03(B)(1) of the Ohio Administrative Code.

Respectfully submitted,

ss: *Randall V. Griffin*

## Notice of Public Information Meeting for Proposed Major Utility Facility

The Dayton Power and Light Company (DP&L) invites residents of Miami County and other interested members of the public to attend an informational open house to discuss its proposed West Milton-Eldean Transmission Line Project – a new 17-mile, single circuit, 138,000-volt (138 kV) transmission line from the existing West Milton Substation to the existing Eldean Substation located northwest of Troy, Ohio.

**The public informational open house will be held from 5:30 to 7:30 PM, Wednesday, November 7, 2018 at The Crystal Room, 845 West Market Street, Troy, Ohio 45373.** The informational open house provides the public an opportunity to meet and talk with project representatives and view detailed maps. There is no formal presentation. Visitors may come and go at any time.

The proposed new 138 kV line will ensure that adequate transmission system voltages are maintained in the northwest area of the DP&L transmission system to comply with the mandatory Federal Energy Regulatory Commission (FERC)/North American Electric Reliability Corporation (NERC) reliability standards. The new line will improve service reliability to the customers in the area.

DP&L has extensively studied the general area between the two substations to identify multiple route options for the transmission line in an effort to minimize any impacts to sensitive areas and land uses. Based on the study's preliminary results, DP&L has identified the transmission line routes that are shown on the map.

These routes under consideration largely follow road right-of-way (often where electric distribution lines already exist) and DP&L's existing transmission line right-of-way (south and west of West Milton). The proposed routes were also designed to align with property lines where feasible. It is anticipated that the new line will be installed on single wood poles, with steel poles at select locations, averaging 70-90 feet in height.

The Ohio Power Siting Board (OPSB) is responsible for reviewing information for the project, including public comments and input, and determining whether to issue a Certificate of Environmental Compatibility and Public Need approving the project. DP&L plans to file an application with the OPSB in early 2019 for the board's review and approval of the transmission line siting. The application will include a preferred and alternate route for most sections of the project area. If the application is approved by the OPSB, construction of the transmission line could begin in 2021 and be completed by June 2022. Estimates show this is an approximate \$12 million investment. The docket number for the project is 18-1259-EL-BIX and shall be included with any correspondence.

Public comments will be accepted and considered by DP&L staff as part of the process of further evaluating the proposed routes. Interested parties may also send written comments or questions to: The Dayton Power and Light Company, ATTN: West Milton-Eldean Project Team, 1900 Dryden Road, Area 420, Dayton, Ohio 45439, or [westmiltoneldeanteam@aas.com](mailto:westmiltoneldeanteam@aas.com), or request information or comment by leaving a message at 937-331-4314.

Information is also available at the project's website at <https://www.dpandl.com/about-dpl/who-we-are/system-improvements/west>

# Notice of Public Information Meeting for Proposed Major Utility Facility

The Dayton Power and Light Company (DP&L) invites residents of Miami County and other interested members of the public to attend an informational open house to discuss a proposed West Milton-Eldean Transmission Line Project - a new 7-mile, single circuit 138,000-volt (138kV) transmission line from the existing West Milton Substation to the existing Eldean Substation located northwest of Troy, Ohio.

The public informational open house will be held from 5:30 to 7:30 PM, Wednesday, November 7, 2018 at The Crystal Room, 845 West Market Street, Troy, Ohio 45373. The informational open house provides the public an opportunity to meet and talk with project representatives and view detailed maps. There is no formal presentation. Visitors may come and go at any time.

The proposed new 138 kV line will ensure that adequate transmission system voltages are maintained in the northwest area of the DP&L transmission system to comply with the mandatory Federal Energy Regulatory Commission (FERC)/North American Electric Reliability Corporation (NERC) reliability standards. The new line will improve service reliability to the customers in the area.

DP&L has extensively studied the general area between the two substations to identify multiple route options for the transmission line in an effort to minimize any impacts to sensitive areas and land uses. Based on the study's preliminary results, DP&L has identified the transmission routes that are shown on the map. These routes under consideration largely follow road right-of-way (often where electric distribution lines already exist) and DP&L's existing transmission right-of-way (south and west of West Milton). The proposed routes were also designed to align with property lines where feasible. It is anticipated that the new line will be installed on single wood poles, with steel poles at select locations, averaging 70-90 feet in height.

The Ohio Power Siting Board (OPSB) is responsible for reviewing information for the project, including public comments and input, and determining whether to issue a Certificate of Environmental Compatibility and Public Need approving the project. DP&L plans to file an application with the OPSB in early 2019 for the board's review and approval of the transmission line siting. The application will include a preferred and alternate route for most sections of the project area. If the application is approved by the OPSB, construction of the transmission line could begin in 2021 and be completed by June 2022. Estimates show this is an approximate \$12 million investment. The docket number for the project is 18-1259-EL-BTX and shall be included with any correspondence.

Public comments will be accepted and considered by DP&L staff as part of the process of further evaluating the proposed routes. Interested parties may also send written comments or questions to: The Dayton Power and Light Company, ATTN: West Milton-Eldean Project Team, 1900 Dryden Road, Area 420, Dayton, Ohio 45439, or [westmiltoneldeanteam@aes.com](mailto:westmiltoneldeanteam@aes.com), or request information or comment by leaving a message at 937-331-4314.
