

Public comments 17-2295-EL-BGN

My stomach just sickens when I think of the scam on these wind turbines. Without the subsidies and tax breaks these would not even be considered . Our community is not ignorant about the scam of these turbines. The poor people are going to pay again.

Linda Mulligan

I am writing you in regards to the safety and welfare of Seneca county. The WHO (World Health Organization) has published information on unsafe noise levels. The Wind companies put out a map that I hope was included in their application that shows sound levels at or above the safe limit. The Seneca East H.S. has 12 turbines very close to it not including the of homes that are going to be affected. This project needs to be stopped right now before it goes any farther. There is a large number of Seneca County residence that are concerned about this. This is to populated of a community for this many wind turbines. They are to close to our homes so I am asking you to look out for the residents of Seneca County. Thank You
