Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Tuesday, November 27, 2018 9:32:25 AM

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Debra Francis

Dear PUCO Docketing Division,

Let Ohio be a leader in renewable energy. I thought we couldn't rely on solar in Cincinnati until I talked to my brother in law who is not only making energy for his own home but selling some back to his local company in Boston Mass. !! The technology is here.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Date: Tuesday, November 27, 2018 6:21:26 AM

Dear PUCO Docketing Division,

Cleaner air and water will also cut down on health costs for Ohioans. Who doesn't know someone with asthma who would be harmed by poor air quality? Likewise, cleaner air and water will save Ohio the costs of cleaning up pollution from our current energy sources.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

Date: Tuesday, November 27, 2018 6:05:54 AM

Dear PUCO Docketing Division,

I highly encourage this development. As many of you know, we are about to endure an economic hit from GM closing down its Lordstown plant, and laying off employees. With the government's recent report on the climate changing, we can't afford not to take steps to use renewable energy. I highly encourage it as both persons in skilled trades (electricians) and college graduates (electrical engineers) could be put to work and help people, planet, and profit--the 3 P's of corporate social responsibility.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

Solar and wind are really good and affordable. Its the answer but as a worker at miami fort power plant and a solar owner i know it can account for at bare minimum 50% of energy consumption. All the state land along the highways, unusable hill side land, vacant state and municipal property everywhere could have panels tied into the grid. The amount of investment along with LED night lighting would be a net positive in tax revenue as soon as 5 years with 10 years being absolute max. After the systems are payed off towns all across Ohio would be getting revenue hand over fist. It just makes sense.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Monday, November 26, 2018 4:48:46 PM

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Marilyn Berman

DOCKETING CASE #: 18-0501-EL-FOR

SUBJECT: Support bringing renewable energy to Ohio

Please docket the following in the case number above.

To PUCO, I strongly support this project that brings renewable energy to Ohio. As a parent and a public health advocate, I am concerned with the impact of fossil fuels on our air and water that affect developing minds and bodies. I'm also frightened for my future and especially my children's future due to climate change. But I'm also optimistic. That is because I know we can make good investments NOW that will clear our air and water AND curb climate change AND strengthen Ohio's economy short and long term. Maybe one of my children will grow up healthy and have one of those good jobs in the future? Thank you for listening. Please make the right choice for Ohio and support this project. Sincerely, Beth Conrey

Date: Monday, November 26, 2018 11:42:43 PM

Dear Public Utilities Commission of Ohio:

I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

Date: Tuesday, November 27, 2018 10:21:36 AM

Dear PUCO Docketing Division,

This would be a HUGE boon to our economy. I saw two solar start ups in SE Ohio go from ideas to nationally recognized multimillion dollar companies in 10 years. This technology is not going anywhere, the demand for solar energy is only growing. If we get involved early Ohio can be a leader in this industry, bringing stable jobs (manufacturing!) and money into our state economy. Please support this!!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Jamie Huckins-Barker

Subject: Please Approve the Ohio Solar Projects: Comment on Case No. 18-501-EL-FOR
Date: Tuesday, November 27, 2018 2:17:54 PM

Dear Public Utilities Commission of Ohio:

I'm writing in support of American Electric Power (AEP)'s proposed solar energy project and ask that my comment be docketed in case No. 18-501-EL-FOR.

These innovative solar farms will bring low-cost renewable energy to the state, while saving customers money on their utility bills and spurring the creation of new jobs for Appalachian Ohio.

In fact, they would support more than 4,000 jobs, including 113 sustainable manufacturing jobs in the solar supply chain.

States across the country are investing in cheaper, cleaner, and more reliable energy sources that are benefiting local economies and our environment. And now it's Ohio's turn.

We have done our part to make clean energy a reality by installing 43 solar panels on our house to provide our own clean, solar energy.

Please help support Ohio's clean energy future and make the state a solar energy leader in the Midwest!

Thank you so much for your time.

Robert Barron
Cincinnati, OH

Dear PUCO Docketing Division,

I will be gravely honest-Ohio is severely lacking in modern ideology when it comes to the environment. Why are we even wasting time with this step?? Renewable energy is a no-brainer-it will create jobs, it will even out costs, it will help reduce pollution, which as the foremost developed nation is our duty. Let's take Ohio into the future!

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.
