Facility components, parcel boundaries, and pipeline data provided by Apex. 5. Wind turbine setbacks include 1,371 feet from turbine setbacks include 1,371 feet from non-participating parcels and 662.2 feet from existing pipelines, transmission lines, and public roads. 6. A survey will be conducted to inform final Facility design, and to verify the precise location of gas pipelines. The exact turbine locations may be subject to minor engineering revisions (micro-siting) prior to construction. Any such micro-siting will commly with state laws and (micro-sting yill comply with state laws and regulations (including all applicable setbacks). be compatible with landowner preferences, and be presented at the preconstruction meeting with OPSB. 7. Map Scale 1: 24,000.
