**Date:** Tuesday, January 15, 2019 3:29:25 PM

---

Dear PUCO Docketing Division,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Robert Sherding

Support AEP's Ohio Solar Power Proposal > I am writing to express my concern about the imminent threat that climate change poses to our state, our country, to our people and the future of our children. As a parent of two young children, I often think about how different the world could become in their lifetimes, the challenges that they could have to deal with, and the costs related to recovery of ever-increasing natural disasters. An overwhelming number of scientists agree, and signs abound that climate change is occurring much faster than was initially predicted. We have only a few critical years before the changes become irreversible.

To secure a future for our nation and our children now is the time to set a new and positive direction for our state energy portfolio. I was encouraged by the proposals made by AEP Ohio to build Solar facilities, showing the response to the demand from customers and the Ohio public for renewable energy. Projects like this should be embraced and encouraged. Although there may not be an imminent need for this power, there is an urgent need to begin the migration to reduce reliance on dirty energy. This project begins that migration and include long term financial benefits. It is truly a win-win option for Ohio.

Dear PUCO Docketing Division,

Speaking as an Ohio EAP electric customer, please do the right thing and approve AEP's proposed projects, which would lower our bills over the long-term, help reduce pollution, and bring much needed jobs to Ohio, especially areas that have faced tough economic times.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Dear PUCO Docketing Division,

It is time to make clean energy a priority and decrease the addiction to fossil fuels that are ruining our beautiful planet. We can also use the jobs that will be initiated with this conversion.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

We would like the cleanest air possible, and have already made personal investment in renewable energies. However, we are still dependent on AEP, and want our investment in AEP to go toward cleaner fuels. We know that right now every time we use AEP electricity we are making more pollution in the form of mercury and other pollutants, and wish we could be purchasing clean energy. It makes more sense to use a public utility for this purpose than to have everyone purchasing their own solar panels. We would really like to be PROUD of being AEP customers rather than embarrassed by it. As a public utility AEP should serve the public with cleaner air.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.
