Date: Monday, January 28, 2019 9:52:26 AM

Dear PUCO Docketing Division,

I strongly support renewable energy. Cleaner air and water must be supported to maintain public health.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Valerie Van Iden

Date: Sunday, January 27, 2019 4:05:17 PM

Dear PUCO Docketing Division,

I favor AEP's development of a renewable power project in southern Ohio. As a college junior, I learned the basics of the greenhouse effect of gases like CO₂ that result from combustion of fossil fuels. My understanding of how the burning of some fuels is causing dangerous global warming has led me to support this project.

Michael J. Hamill, Licensed P.E.

Dear PUCO Docketing Division,

If Mother Nature shines the sunstar, capture that energy. If Mother Nature moves water in a stream, small or large, or in the oceans, capture that energy. If Nature moves the air, capture that energy. There is geothermal energy in the ground at your feet, wherever you are. Capture that energy. Mother Nature is already energy rich. All you have to do is capture what's already being done Naturally. This preserves fossil fuels for uses we can't readily adapt, making them supply human demands longer into the future.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Sunday, January 27, 2019 8:57:33 PM

Dear PUCO Docketing Division,

My family already tries the best we can to lower our energy bill by turning lights off, keeping our house chilly during the winter, unplugging items that aren't in use, etc. Even doing this, my family sometimes struggles to pay our bills given the fact that we have two in college and have increasing taxes due to gentrification in our neighborhood. The lower cost would help us out, and the environmental aspect of adopting solar energy is much needed to help protect my generation and future generations. The UN has predicted a frightening fact- that if we continue to use fossil fuels at the current rate, we will run out within my lifetime. Fossil fuels are a NONRENEWABLE energy source, their use is finite, and we will continue to destroy more and more of the environment attempting to extract them. As we do this, we will continue to affect ourselves. Dirtier air, dirtier water, contaminated soil, and other impacts such as earthquakes due to fracking. AS A 19 YEAR OLD INDIVIDUAL, I live in a generation where I must acknowledge the state of our world and act to help it before it is too late. I hope that others, like you, would be prepared to leave future generations in a better place, not worse off. While choices like these are usually made based on economics, I am here to tell you that this decision could literally save lives. Every little thing you do helps. Thank you.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.
