BEFORE THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Application of)	
Ohio Power Company to Adjust)	Case No. 19-232-EL-RDR
The Economic Development Cost)	
Recovery Rider Rate)	

APPLICATION

- 1. Ohio Power Company ("Company" or "AEP Ohio") is an electric light company, as that term is defined in §§4905.03 and 4928.01 (A) (7), Ohio Rev. Code.
- 2. In the Company's Electric Security Plan proceeding (Case No. 13-2385-EL-SSO), the Commission authorized an Economic Development Cost Recovery Rider (EDR). Further, the Public Utilities Commission of Ohio (Commission) in Case No. 16-1852-EL-SSO on April 25, 2018 approved AEP Ohio's request to extend and modify its existing riders, including the EDR. The EDR is a rate that is determined by multiplying a percentage by the customers' distribution charges. The EDR is to be adjusted periodically to recover economic development amounts authorized by the Commission.
- 3. By this application the Company proposes to update its EDR rate approved in AEP Ohio's most recent EDR update (in Case No.16-1852-EL-SSO) based on unrecovered costs resulting from the delta revenues (plus associated carrying costs) under the current or prior reasonable arrangements (contracts) with Eramet Marietta, Inc. (Eramet), Case No. 09-516-EL-AEC; with Globe Metallurgical, Inc. (Globe), Case Nos. 13-1170-EL-AEC, 15-327-EL-AEC

- and 16-737-EL-AEC; with TimkenSteel Corp. (TimkenSteel), Case No. 15-1857-EL-AEC; and with Acero Junction, Inc., Case No. 17-2132-EL-AEC, which contract was transferred to JSW Steel Ohio, Inc. per the Commission's August 8, 2018 Entry (JSW). In compliance with the Commission Order in Case No. 16-1852-EL-SSO, the delta revenue also now includes half of program costs associated with the EE/PDR SubTran/Tran customers, half of the Interruptible Credit, and the entire Automaker Credit.
- 4. The detailed calculations and supporting data are reflected in the Schedules attached to the application. Schedule 1 is a summary sheet showing each component of the proposed EDR rates and is supported by calculations found in the remaining schedules. Schedule 2 shows the carrying charge calculations. Schedules 3, 4, 5, and 6 show the specific delta revenue calculations for the Eramet, Globe, TimkenSteel, and Acero contracts, respectively. Schedule 7 shows the typical bill impacts of the change in the EDR rate for Columbus Southern Power and Ohio Power rate zones. Some of the information is redacted from the public version of the schedules and a separate motion for a protective order is being filed in accordance with OAC 4901-1-24.
- 5. Based on the estimated cost over-recoveries as evidenced by the projected 2019 delta revenues, as well as on the actual and projected delta revenues associated with the Eramet, Globe, TimkenSteel, and Acero contracts, the Company proposes that the EDR rate, to be applied to customers' distribution charges, should be set at 1.97966%, effective with the first billing cycle of

- April 2019. (See Schedule 1). The EDR rate prior to the first billing cycle of April 2019 will remain at 3.92085%.
- 6. The Company's approach in this application calculates a rate based on the over-/under-recovery balance as of December 2018, the projected over-/under-recoveries from January through March 2019, and the forecasted delta revenues and rider revenue from April 2019 through September 2019. This approach is consistent with the Company's most recent EDR update.
- 7. The Company's rate approach continues to include the accrual of a carrying cost at the weighted average cost of long-term debt. In addition, if during any EDR rate period the Company determines either that the EDR collections are or will be substantially different than anticipated or the unrecovered costs based on delta revenues are or will be substantially different than anticipated (both of which typically would be related to significant changes to customers' load), it will file an application to modify its EDR rate for the remainder of that period in order to avoid unduly substantial over-and under-recovery deferrals. The Company will also continue its over/under accounting to track the delta revenues and the EDR collections in order to reconcile any difference through subsequent EDR rate adjustments.
- 8. Consistent with OAC 4901:1-38-08 and the Commission's decision in the prior EDR cases, the Company intends to continue making semiannual adjustments to its EDR rate, to be effective with the first billing cycle of April and of October in each year. The Company believes that its proposed EDR

¹ To be clear, all of the percentages discussed herein apply to only the distribution portion of the bill, not the entire bill.

rate is just and reasonable and, therefore, no hearing is needed. A hearing

would result in needless delay in beginning the recovery of the delta revenues

and associated carrying costs identified above, thereby resulting in increased

carrying costs to the Company's customers.

9. The Company requests that at the conclusion of the 20-day comment period

prescribed by OAC 4901:1-38-08(C), the Commission approve this

application for implementation by the start of the first billing cycle of April

2019. If the Commission is unable to conclude this proceeding in time for the

EDR rates to be effective with the first billing cycle of April 2019, the

Company requests interim authorization to begin collection based on the

proposed EDR rate at the start of the first billing cycle of April 2019, with the

understanding that the EDR recovery would be trued-up to the Commission's

final order in this matter. Permitting such interim collection will avoid the

impact of collecting the unrecovered costs over a shorter period of time.

Respectfully submitted,

/s/ Steven T. Nourse
