## Support AEP Clean Energy Initiative

Dear Chairman Haque and fellow Commissioners,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO).

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct hundreds of megawatts of new wind and solar in Ohio in the near future will create one of the largest clean energy projects in Ohio's history. These projects have the potential to make Ohio a leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

*Maude Sullivan*

What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

### Support AEP Clean Energy Initiative

Dear Chairman Haque and fellow Commissioners,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO).

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct hundreds of megawatts of new wind and solar in Ohio in the near future will create one of the largest clean energy projects in Ohio's history. These projects have the potential to make Ohio a leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

### Support AEP Clean Energy Initiative

Dear Chairman Haque and fellow Commissioners,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO).

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct hundreds of megawatts of new wind and solar in Ohio in the near future will create one of the largest clean energy projects in Ohio's history. These projects have the potential to make Ohio a leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

*Amber Turnmel*

### Support AEP Clean Energy Initiative

Dear Chairman Haque and fellow Commissioners,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO).

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct hundreds of megawatts of new wind and solar in Ohio in the near future will create one of the largest clean energy projects in Ohio's history. These projects have the potential to make Ohio a leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

*Jocely Johnson*

## Support AEP Clean Energy Initiative

Dear Chairman Haque and fellow Commissioners,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO).

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct hundreds of megawatts of new wind and solar in Ohio in the near future will create one of the largest clean energy projects in Ohio's history. These projects have the potential to make Ohio a leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

Sincerely,

Cailee Smith

## Support AEP Clean Energy Initiative

Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years will create the largest clean energy projects in Ohio's history. This projects have the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.
