## Support AEP Clean Energy Initiative

Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years will create the largest clean energy projects in Ohio's history. This projects have the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## I Support Energy Efficiency

Dear Governor Kasich,

Energy efficiency is our cheapest and cleanest energy source. It protects clean air and water, creates construction and manufacturing jobs, and reduces energy bills. But under your watch, Ohio has gone in the wrong direction.

I ask you to protect public health and the economy by promoting energy efficiency policies. Specifically, I ask you to:

- update commercial and residential energy codes to incorporate the latest money-saving efficiency technologies
- prioritize low-income weatherization, so Ohio's most vulnerable families can spend more money on necessities like medication and food
- make energy efficiency policies the centerpiece of Ohio's plan to reduce climate change pollution
- require utilities to do their part by investing in energy efficiency.

Sincerely,

This project has the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of this project. Not only will this project bring millions of dollars and hundreds of construction jobs to our state, it may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## Support AEP Clean Energy

Governor Kasich and Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years is the largest clean energy project in Ohio's history. This project has the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of this project. Not only will this project bring millions of dollars and hundreds of construction jobs to our state, it may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Sean Delany

## Support AEP Clean Energy Initiative

Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years will create the largest clean energy projects in Ohio's history. This projects have the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## Support AEP Clean Energy Initiative

Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years will create the largest clean energy projects in Ohio's history. This projects have the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## Support AEP Clean Energy Initiative

Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years will create the largest clean energy projects in Ohio's history. This projects have the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## Support AEP Clean Energy

Governor Kasich and Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years is the largest clean energy project in Ohio's history. This project has the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of this project. Not only will this project bring millions of dollars and hundreds of construction jobs to our state, it may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.

## Support AEP Clean Energy Initiative

Chairman Haque,

I am writing to urge your support for AEP's clean energy and job creation proposal pending at the Public Utility Commission (PUCO)

AEP's proposed project represents one of the largest energy infrastructure investments in recent Ohio history. AEP's plan to construct at least 900 megawatts of new wind and solar in Ohio over the next five years will create the largest clean energy projects in Ohio's history. This projects have the potential to make Ohio the leader of clean energy development in the Great Lakes region.

AEP's proposal represents a major breakthrough for Ohio's growing clean energy economy. What's more, there is the potential to create a solar manufacturing hub in Appalachian Ohio, a possible further benefit of the solar project. Not only will these projects bring millions of dollars and hundreds of construction jobs to our state, they may also create long term sustainable manufacturing jobs and industry in Appalachian Ohio.

AEP's proposal is good for Ohio's economy and good for Ohio's future energy needs and I urge support for AEP's clean energy and job creation plan.
