Comments received via OPSB website, please file in docket.

I strongly support this project. We need wind power for the future of our enviro
We need wind power for a cleaner world

Wind is not safe, not for humans, not for animals, not for plants.

As a family member of individuals with autism and retired special education teacher which included children on the autism spectrum, I am writing you to stop the wind turbine projects in Seneca County. For the last 50 years I have watched the negative effects that various sensory input has on this population. The light flicker, infrasound, flashing lights, etc. are all sources of sensory input that will cause some individuals on the autism spectrum to have extreme negative reactions. Please stop this inevitable tragedy before it ever happens. Thank you.

I'm all for it. I think all the negativity from people who oppose are simply afraid of change.

Re: Seneca County. Our experiences here in Van Wert with wind power has not been good. Complaints about the humming noise, bird kills, flicker issues, set backs too close, and difficulty selling residential property after a wind farm has been set up around them. I would caution any county in Ohio to be careful and not allow them in your county - I wish we had prevented them years ago.

John Rager
