To Whom It May Concern:

NO NO NO

I'm writing to voice my concerns about PUGO
Wind turbines that the companies (Wind) propose
for my county (Seneca) and surrounding counties.

I'm not against clean air but I am if it's across
the road & behind my house.

The noise alone would drive anyone crazy.

I have a lot of birds which I feed, which will
cease. We have hawks, Eagles (lots) deer etc

I haven't heard of any farmers claiming loss
due to animal infestation as I heard someone
claim. We have coon, deer, but we always have.

The health problems, which I've taken time
to investigate, that arise from the turbines is
alarming.

The schools are suppose to "make it big" more
noise, according to some teachers, is as big as
they say & to please keep voting for the levies.

Our counties (I live in Seneca) are very
populated. They are wanting to be built wherever
and extremely tall.

The energy is not as was once used my
mom years ago, and is leading to the East Coast.

Then they need to build them there. They have
no place in peoples yards & lives

Please listen to the people who plead to you, the only ones supporting them are the ones who will benefit financially, and have multiple farms, and these will not effect them directly. It won't be built in their back yards -

There are many more against these than for them.

Speed is ugly. It comes in many forms. - And the wind turbines are one of the biggest. - Someone's pockets, are nicely lined, which is sad, won't beg money. which means more than friends, families, neighbors.

I pray the board truly listens to the people crying for help. This is evil. Put them on the plains or unpopulated areas. I can't believe this is the only place to get energy from.

Thank you for listening

Marty Smith

Commissioner Skepp Thomas has a big financial interest from his Nicks-In-Laws property. I don't know the number of turbines but once again. Money. I honestly believe if money would be removed, the interest in getting them here would go as well - and that's so sad -
