Board Members,

Greetings. I'm contacting to add my voice to the larger community of consumers and advocates who support more market choices and cleaner sources for power generation in Ohio. I agree with many experts in this field that the project is warranted for these reasons...

- * the state of Ohio has failed to produce enough electricity within the state to meet usage requirements.
- * Ohio's utility customers are expecting and in many instances, even demanding cleaner, renewable energy.
- * Solar power projects will create much needed economic development and jobs, will increase Ohio's competitiveness.
- * clean energy projects will produce additional tax revenues for the region and across the state.
- * reducing Ohio's reliance on coal and gas fired energy production will further reduce the negative impact burning fossil fuel has on the environment and public health.

Please approve this project.
