Subject: Comment on Case No. 18-0501-EL-FOR for Renewable Energy
Date: Thursday, February 28, 2019 9:39:49 AM

Dear PUCO Docketing Division,

Good, Clean energy jobs are VERY needed for Ohio! Also I am so sickened of this Shady business with fracking and all of these different gas suppliers coming to my door, w/ crazy talk of rates and the companies randomly changing on my gas bill every month..! It's like the wild west OH Gold Rush of Gas or something. At the expense of our public lands, water supply, and potentially Public Health. Apparently seems to be not much regulation happening at all, at least from my avg everyday layperson perspective. Id like more emphasis on the Public in "Puco" - as a member of the public in Ohio I am requesting that public policy be based on the sound science and evidence regarding climate change. Do the right thing - you will be held accountable, eventually, if not. Supporting toxic Industries and poisoning your citizens doesn't go over very well with the public. Although my analogy isn't exact, I'm aware - I do think you should take a look at the ongoing tragedy (and total PR Nightmare) of our neighbors to the north, in Flint. They say Ohio is the heart of it all; so be on the right side of History get in on the ground floor. Lead the way for the future. Fossil fuels (andPlastics) may have had their place, but we are at a serious Tipping Point now. It's time smart people in places/ positions of power need to realize that. Thank you for your time and attn.

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Adrienne Dillon
