I am opposed to the Emerson Creek Wind Farm. Just as there is no free lunch there is no "free wind money" . Everything comes with a price and consequences.

I'm writing to let you know that I'm not in support of the Emerson Creek/Apex wind turbine project. Case #18-1607-EL-BGN

Documented proof has shown many health issues have occurred when people are living near the turbines. Tinnitus, dizziness, insomnia, panic episodes, nausea, visual blurring, difficulty concentrating, irritability, and tachycardia are some mentioned in studies.

Damage to local roads, farm acreage, and homes due to building of these enormous structures. Dangerous results possible when enormous amounts of concrete, boring, and weight of turbine damages the ecosystem below the actual land. Flooding and infiltration of wells waterways is likely.

Lower appraisals of both land and homes near turbines. Lowering the money supporting local schools.

Lowering school enrollment due to families leaving. Leaving schools with less money than what they started with.

Very little green or reusable energy actually documented from use of turbines.

Loss of pristine farmland and revenue from families who normally vacation here to get away from the cities.

Damage to wild life in the area.

Finally, a lack of trust with Emerson/Apex as they have not been honest or open with their intent, process, or ramifications of the placement, function, maintenance, or removal of wind turbines.

It's my hope that we as a county and community can work together to discover true renewable and green energy that will benefit the community and not damage it to the core. Thank you for your time and your acknowledgement of all that is included with making a decision regarding the wind turbines.

Sincerely,

Audrey Rose

Land owner, Farmer, Educator, and Huron County Resident

The Erie County Commissioners and their residents spoke loud and clear at a public meeting last night. The Commissioners voted against a PILOT for Apex. We do not want turbines in Erie County! Deny the Emerson Creek Wind Project!

Mr Butler,

I am contacting you to express my opposition to the Emerson Creek Wind Farm project being proposed by Apex Clean Energy. While I am not opposed to other forms of energy besides fossil fuels I feel these wind turbines are not a good solution. The benefits of the wind turbines do not outweigh all the negative impacts they pose such as devaluation of property, destruction of roads and intersections, very low benefit compared to cost, and damage to the environment. I ask you and The Ohio Power Siting Board to oppose this project. Thank you for your time.

Sincerely,

Dennis Seifker
