Ninety three percent of high pressure transmission lines are located in rural areas, where the potential for a death and destruction is generally lower, in a catastrophic event. Please do not put this catastrophic event in our urban areas. Our neighborhoods are full of people who depend on you to make safe decisions for them. Please do not put all of us at risk. Aren't our lives worth more than the money Duke and taxes will make. Please consider the human impact!

Bess Sturgill
