Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Thank you.

Sincerely,
Roger Kafer
1135 Harrison Ave

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio!

While I do not know all the details of this proposal, in general such projects not only provide clean, renewable energy but also good provide jobs (both in construction and ongoing operation and maintenance. Moreover, one such successful project tends to lead to others with the same benefits.

Please join me in supporting this project to build a healthier, energy independent future. tomorrow.

Thank you.

Sincerely,
William Heck

I strongly recommend that the solar power project projected to be executed in southern Ohio be approved. It will not only provide power to the area but will generate good living wage jobs in a region that needs this assistance. From my perspective it presents a once in a generation opportunity to meet multiple objectives - help meet energy demands, generate modern manufacturing jobs, help unemployed or underemployed members of the community, and assist local veterans. This is too good an opportunity to pass up. Sincerely, John D. Gardner, Lieutenant General (Retired), native of Columbus.

The Highland Solar Farm is a good thing for Highland County. For one renewal energy is extremely important for every county! The project would create jobs which is much needed for the area. Especially after Airborne closed in Wilmington! I very much support the Highland Solar Farm!

I am in support of a solar farm here in Highland County. Rural areas are always in need of job opportunities. Creating jobs that have a green impact on the environment are even better. Solar energy is renewable source that residents can rely upon. In a rural community there are numerous power outages. A solar source would also reduce the strain on residents' limited income Please, I urge your support on this project for Highland County.

LAWRENCE COUNTY Chamber of Commerce

March 15, 2019

Public Utilities Commission of Ohio
180 E. Broad Street
Columbus, Ohio 43215-3792
Attention IAD

Dear Sir:

The Lawrence County Ohio Chamber of Commerce fully supports the solar panel project in southern Ohio. The Chamber feels that this project will help the area with creating jobs as well as promote growth within the state. The Chamber strives to bring new businesses to the area. By the construction of this facility and introduction of solar energy, southern Ohio will be more appealing for businesses viewing the area as a place working toward growth and improvement.

The Chamber of Commerce is a strong supporter of the solar panel project.

Sincerely,

Shirley Dyer, Director
Lawrence County Chamber of Commerce

To the Public Utilities Commission of Ohio:

The Convention and Visitors Bureau of Lawrence County, Ohio is in support of the solar project to be constructed in southern Ohio. With areas that are working to improve their quality by changing, the need to implement a project as this is a positive approach. From the travel and tourism side, the project would show that the area is advancing its energy producing processes that travelers visiting the area from across the country or internationally. Not only would this help improve the area by adding jobs, but it will make a positive change for the future in southern Ohio. With the area trying to move forward from lack of jobs, we feel that this would be a positive move in developing the area for future development.

In conclusion, we are in support of the solar project and look forward to watching southern Ohio grow by making changes that have our future generations in the forefront.

Sincerely,

Marty Conley

RE: Hecate Energy Solar Project

To the Ohio Power Siting Board,

On behalf of Ohio University's Voinovich School of Leadership and Public Affairs PORTSfuture Program, we express our enthusiastic support for Hecate Energy's proposal to develop a solar manufacturing hub. This project is in connection with AEP Ohio's recent commitment to deploy 400 megawatts (MW) of solar PV over the next four to five years. AEP Ohio has indicated Ohio's Appalachian region as a site preference for these solar installations and we endorse this location.

The PORTSfuture Program is funded by the US Department of Energy Office of Environmental Management (DOE EM) and is a multi-year partnership with DOE EM, the Southern Ohio Diversification Initiative (SODI), and regional stakeholders focused on reindustrializing the former DOE gaseous diffusion facility near Piketon, Ohio, which is located in Ohio Appalachia. Efforts are concentrated on developing an Integrated Energy System-Closed Loop Manufacturing (IES-CLM) complex at the site to fully capitalize on the site's massive infrastructure and other assets. An IES-CLM is founded on an 'all of the above' energy strategy that co-locates energy producers with intensive energy users and employs circular economy/closed loop manufacturing principles that reduce costs, reduce waste, and reduce pollution to the benefit of industries, communities, and the environment. IES-CLM complexes integrate high temperature heat with industrial technologies to: produce electricity; supply predictable, low cost energy; power industrial processes; and produce hydrogen for transportation fuels, polymers, plastics, fertilizer, and the hydrogen fuel cell markets. Solar energy generation and transmission would be an integral contribution to the IES-CLM effort.

Generation of solar power in Ohio will prove to be an important addition to the state's energy portfolio. Solar energy generation will contribute to Ohio's energy diversification and energy security as part of an 'all of the above' energy approach. The estimated 600 solar installation-related construction jobs and 600 permanent manufacturing jobs that this project intends to create would be very impactful for southern Ohio's impoverished counties. Additionally, the Hecate solar initiative will enable the State of Ohio to attract 21st century industries that are intensive energy consumers, such as data centers, and corporations that are becoming more environmentally conscious, such as Intel, Kohl's, Apple, Walmart, and others that demand renewable energy sources as part of their energy portfolios.

The Ohio University Voinovich School PORTSfuture Program strongly supports this application and looks forward to future collaborations with AEP Ohio and Hecate Energy that align with our efforts to help Ohio Appalachian communities attract industry, create jobs, and grow the regional economy.

Sincerely,

Stephanie Howe
Associate Director for Human Capital and Operations
Voinovich School of Leadership and Public Affairs

Dr. Ben Cross P.E.
Executive in Residence

Appalachian Partnership Inc. is a private-sector business led regional economic development organization serving the Appalachian region of Ohio that exists to provide a business voice for promoting action to advance the economic prosperity of its region. We strongly support the need for and value of the solar power generation proposed in Docket 18-1334. In our work to promote regional economic development we frequently encounter companies that will not consider an Ohio location unless we can provide them with the opportunity to purchase locally-generated green energy - which is currently impossible to do. In addition, the jobs created through this project will help offset coal-power generation jobs lost in the project's workforce catchment area - specifically the 400+ coal-fired generation jobs that were lost with the June 2018 closure of generating facilities in neighboring Adams County, Ohio. We strongly urge approval of this Docket.

John Molinaro

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Thank you.

Sincerely,
Stephen Sedlak

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home. It is also very economical. Unsubsidized solar and wind farms are the least expensive form of energy generation. Unlike coal, natural gas, oil and nuclear; there is no mining, transporting or waste to deal with. The cost of the wind and the sun is free and will go on forever! Please approve this vital project.

Sincerely,

Tom Schock

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Thank you.

Sincerely,
Kara Afrates

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. I look into the eyes of my 9 month old grandson and I know that something significant needs to change in the sourcing of our power, if there is to be hope for his future here in Ohio. We cannot continue blithely down this road, relying on energy sources that are undermining the health of our planet. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy. It is the only ethical choice for the lives of the next generation...and the one that follows.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

My family has a 14-kilowatt solar array on the roof of our house. We invested in becoming a rooftop solar distributive generator because we believe in clean, sustainable energy. The United States needs to walk away from gas, oil, tar sands, coal, and other non-renewable sources of energy. We need to switch over to sustainable energies like solar, wind, geothermal, biofuel, etc. As far as we know, this is the only planet that can sustain life. Our spacecraft is fragile and we must stop destroying it. Please approve the 300 megawatt solar installation in Highland County.

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Thank you.

Sincerely,
James Sweet

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

We are in massive climate chaos driven by heat trapping gases produced by burning fossil fuels like coal, oil, and natural gas. In addition methane from leaking gas wells, abandoned and new, and methane storage places. If we wish to have a livable planet, we must transit ASAP (i.e., on decade) to renewable energy sources like wind, solar, and geothermal.

I am writing to you today in support necessary and important 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Bringing clean, renewable energy installations and manufacturing will bring needed jobs to Ohio, to replace the good paying jobs being lost to GM moving it's jobs out of the country and dirty, dangerous mining jobs. Let's get Ohio up to speed in caring for our people and the only planet we have to live on.

Thank you.

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Thank you.

Sincerely,
Ron McCutcheon

I believe that this solar site will be a great project to the area as it will provide clean renewable energy with \$2,000,000.00 of new Highland Co. State mandated tax money. This is in a area that has received no jobs or business related growth. This area has been in decline since Airborne left Wilmington, Ohio. There are a large number of jobs for a year or more with all of the supporting businesses Restaurant's, gas stations, hotels, etc. that will have a strong growth during the building phase. There are local businesses already receiving some of the benefits from this project during the permitting stage. When construction is over the taxes will continue and permanent jobs will be maintained. I support this project.

Thanks

Doug Carraher

Our organization (Corporation for Ohio Appalachian Development) is in strong support of the proposed project. COAD is a coalition of 17 Community Action Agencies serving 30 counties in southern and southeastern Ohio. Our core mission is alleviating poverty throughout the region. The economic development, increased tax revenue and job creation that will result from this project will be a significant benefit to the entire region. We are endorsing this project wholeheartedly and look forward to the economic benefit to the region.

The solar project in Appalachia offers and opportunity to create jobs and educational opportunities in an area where there is desperate need. I hope Ohio will embrace an "all of the above " policy and allow all types of energy, including solar, to compete in the marketplace.

I am writing in favor of the project because I know it will create good paying jobs and will be a strong step toward helping Ohio move toward the future in energy supplies. Neither I nor my member agencies stand to profit by this. We are in favor because we want to see Ohio's economy continue to be strengthened. This is a step toward that. It needs to be done.

My name is John Carraher. I live at Gath North Rd. and I am a land owner who is participating in the Highland Solar Farm project. When we were first approached with the option to be involved in the project there were a lot of emotions and concerns. The same concerns that many of our neighbors have now. The decision to participate wasn't an easy one. We are hopeful that you approve of this solar facility after learning more about what it will provide for our county, townships, local businesses, and especially the schools. The tax benefits that this facility will provide will benefit both Lynchburg-Clay and Bright Local schools and their students. These schools could greatly benefit from additional tax dollars for upgrades in technology, curriculum, staff, etc. I have seen the steps taken by Hecate to ensure that there will not be any ecological problems. As a farmer, we are always concerned for our neighbors safety from pesticides, insecticides, and fertilizer run off. This solar farm will prevent fertilizer applications and numerous applications of insecticide and pesticides across these field every year. In conclusion, I am hopeful you will allow this solar farm to be developed. We are in need of renewable energy and solar is clean, quiet, efficient, and most importantly safe. Highland Solar Farm will be a great asset to Highland County, the townships, the local schools, and especially all the residents. Thank you for your time. Sincerely, John W. Carraher

As a resident of Highland County and an advocate of job creation and sustainability, I represent rural, Appalachian Ohio. My husband and I settled here over 30 years ago to build our lives and to raise our family here. Our three daughters attended school at Bright Local, the area in which this project is slated to be built. We still live in the community and while we both work full-time jobs, we also manage a small farm. Local schools have always struggled financially and the commitment of families and community has always been an asset. The values that my husband and I have witnessed in our 30+ years in this community demonstrates the love of our neighbor and the love of our country. This community consists of many farmers and although there are employment opportunities in Highland County, many commute outside the county as well. My husband and I are in support of this Solar Farm Project to be built in Highland County. We are excited to be part of such an amazing, clean-power project with bringing renewable-energy to our county, state, and possibly others. We support job creation which will in turn will significantly increase property tax revenue for the locality, thus providing revenue for our schools. We are confident that Hecate Energy will build a solar energy generation facility that will be up to code and will stay true to their commitment for this project. We are thankful that Highland County has an opportunity to be home to the next clean-power, renewable, solar-energy project.
