Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today in support of the 300 megawatt solar installation in Highland County. Ohio lags far behind the rest of the country in developing renewable energy, with less than 3% of our generation coming from clean energy. This is an opportunity to bring a large-scale solar project to southern Ohio! Investing in renewable energy brings jobs, mitigates climate change, and boosts our economy.

Please join me in supporting this project to build a healthier tomorrow. Protecting the air, water, and land of all who call Ohio home.

Thank you.

Sincerely,

J M

I am in support of the proposed Solar Farm Project to be built in Highland County. I believe it will be a great opportunity for Highland County in many ways including the employment opportunities it will bring to our community.

Dear Ohio Power Siting Board OPSB,

Dear Members of the Ohio Power Siting Board

I am writing to you today to inform you that I am not in favor of supporting the 300 megawatt solar installation in Highland County. Ohio has an abundance of natural gas that is also considered to be clean energy. I am Not sure of the amount of acreage this facility will need to complete this solar station, but I definitely do not favor the total destruction of the trees and other natural vegetation and wildlife that may exist in that area. AS I stated at the beginning of this letter, we have an abundance of natural gas that has been extracted and continues to be extracted from long existing wells and the newer wells that have been developed in the eastern part of this state in recent years. I propose Ohio continues to use the existing natural gas that is already in place. Many people have lost their land to these gas companies for a fraction of the lands cost and/or through imminent domain. I certainly don't won't to see more people lose their property to more endeavors to be green. I recently saw the massive Mickey Mouse megawatt solar facility and I am not impressed by the massive amounts of acreage that was deforested to place the solar panels to run an overrated, overpriced theme park.

Please join me in supporting this

Sincerely,
Mary Delaney

This project is vital to Ohio and future growth of alternative energy sources in our state. Twenty first century thinking and planning must be in place to insure that Ohio citizens enjoy the growth of this industry and the benefits of being a leader in solar and wind energy systems. Roxanne Groff, former Athens County Commissioner and Bern Township Trustee.

Bringing this solar power to our area would be beneficial in creating jobs in a community that really needs them to bring work back to this area. It would also create more business for the local business's in bringing more people to the area to eat, shop and work. Solar Power is also beneficial in helping us to lower bills and not rely on the electric so when there is a power outage we have another way to operate our businesses and homes. We need improvements in and around our county so that people will want to live and work here.

I thoroughly support the development of solar power in Ohio and its increased usage as a component of the electrical supply. I have solar panels on my home. Renewable energy is attractive to many businesses considering moving to Ohio which means it can have a positive long term impact on our economy. The construction of the solar farm will create over 3500 temporary jobs and 100+ permanent jobs. AEP has polled its clients and they have indicated that they want more clean energy. Help Ohio regain its place in the renewable energy field.

Approve this proposal
