---

I live on a farm close to the solar fields. I question the safety of these panels toxic byproducts and polluted water in the streams & creeks. We are down stream and have cattle that drink out of the creek. With so many panels in one area will be much higher pollution than a smaller area. Think of the future of our children and grandchildren and this much solar power close to us, do you have a plan of disposal after the 20-30 year use of these panels. The cost of disposing of them. I think much more needs to be studied about the dangers and the neighboring land owners should have a say in what you are doing.
