Venice - Seneca

Comments

No Turbines in Seneca, Erie, or Huron County!
Research proves these turbines are a health hazard.
They are not reliable - wind doesn't blow all the time and
other fuel is needed to keep them running. This entire area
is rural farmland & if turbines go in in Erie, Huron, & Seneca
County we will become an industrial wasteland of rusted
out dead turbines. Thank you for your thoughts and insights regarding this project. Non participating residents
upon to suffer with these things. The

Poor leaseholders will be sorry they agreed to this.

Comments

"Due to the ban on DDT, Endanger Species Act, protection efforts by the ODW biologists, the #/10 of Bald Eagles (our National bird) climbed from 4 to 200. The Register p.D5 March 30-31, 2019 Erie - Now you want to put tall wind turbines & risk bald eagles lives & bats. Disrupting wild life is a negative. I am concerned about the Kurst, our water system.

Thank you for your thoughts and insights regarding this project.

I do not feel it is right for people who do not live here
to make decisions for our Area, Home built due to
the love of nature & country living.
I say No to Wind Turbines.

Emerson Creek Wind

Comments

① I feel there is too much opposition to this project to call us a "willing host community".
② I am opposed to this project - Ohio's 1125 ft setback rule is not enough to protect nonparticipating residents from shadow flicker, noise, & infrasound. I feel there is enough information including →

Thank you for your thoughts and insights regarding this project.

peer reviewed studies, personal accounts world wide, ^{etc} to have
the setback be 1 mile from a nonparticipating home owner.
Compare to the tobacco industry. The tobacco industry
pushed their product for years, making money.
I don't want to be a guinea pig in an experiment I didn't sign
up for.

OPSB

Concerning Project 18-1607-EL-BGN
Emerson Creek

I am against this project.

Answers to your 8 criteria would be
a no vote to this project in my opinion.

#1. If the existing power plants must power down and back up when the wind is blowing that would mean turbines are not a NEED.

They are a additional power source.

We already produce enough if the other sources must power down.

#2 The environmental impact is tremendous in a area where bird watchers from around the world come to see the migration.

#3 Possible ground water contamination in a highly populated area. Inexpensable to try and put them in this area.

#4 Reliability - You know the answer. No

#5 It will intercept air travel (OVER)

according to FAA. Ground water is very sensitive in this area due to karst in Bellevue area.

#6 Back to public interest and necessity
You have not much public support except people being paid and it is not a need.

#7 With no bats the farmers will be needing many more chemicals.

#8 There are alternatives - Solar + Nuclear power plants. It will change nature forever.

Your Criteria not mine.
Do not allow these industrial turbines in our area.

Frank Bishop

Bellevue OH 44811
419-217-7664

Ohio Power Siting Board

I oppose wind turbine in our rural community for various reasons. Of most you have already heard. Our area is unique for the fact of our Karst, and I understand you'll have an engineer study the effects. But we will have to live with the effects, good or bad. Another concern is our relationship with our north coast. The Air National Guard has been flying coastal low level flights on a routine ^{bases} for as long as I have been living here. The altitude they fly ~~is~~ is lower than the proposed turbines.

Many U.S. states and foreign countries are making changes and adjustments to their laws because of the effects of wind turbines. Why wouldn't the DPSB learn from those mistakes instead of making the same mistakes and expect different results?

Please do not approve.

April 2, 2019

Both my husband and I are absolutely and totally opposed to the wind turbine project that will be affecting so many homeowners in Erie and Huron Counties in Ohio. Just why do you think people choose to move to/ live in these rural areas of these counties ? They live here because they LOVE the quiet and serene environments these places have to offer to them and their families. Do you want to live in a peaceful area, and then have your life completely turned upside down by these huge monster-like wind turbines? These wind monsters do not sleep and neither will we, the homeowners and families who must tolerate the negatives 24/7/365. Shame on all of you for attempting to treat people like prisoners of modern science whose benefits will never outweigh the total destruction they will cause to innocent people in hundreds of different ways....you need to rethink just how this will change lives- and not in good ways. (Will some of these monster turbines also be residing in your backyards ???)

Robert and Rhoda Sostakowski
North Ridgeville, Ohio 44039

QUESTIONS THAT REQUIRE ANSWERS:

1. What company makes these tunnels?
2. Where are they made?
3. What is the largest vehicle required to move the largest section of the tower?
4. How many vehicles will be in the convoy for each section of the tower? Times that by 60 towers?
5. Should any local people be hired to work on this project, what will they do, and how much will they be paid? Prevailing wages?
6. 6. Sherman Township roads, in particular, are narrow even though they are two-lane, what is the plan to get these massive machines over these roads?
7. Who will pay for rebuilding the roads?
8. Since wind power is not totally self-sustaining, how much will the residents be affected by taxes to support a system it doesn't want and has environmentally destroyed the area?
9. Do the people who work for APEX know the meaning of the word INTEGRITY? If they did, they wouldn't be intruding in our lives.
10. What makes any of you think that you bullies are welcome here?
- 11.

But Asen

Clifford44847@gmail.com 

Docket # 18-1607-EL-BGN

The Ohio Power Siting Board
180 East Broad Street
Columbus, Ohio 43215

Here is a picture of an eagle just east of 7016 Strecker Rd Oxford Township (Monroeville), Ohio
March 27th, 2019

Please DO NOT allow wind turbines in Erie or Huron Counties.

Rosemary Clifford

To the Ohio Power Siting Board:

Please see attached a photograph of one of our many Bald Eagles that currently reside within the northern boundaries of the Emerson Creek Project, this picture being taken along Strecker Road, between Ransom and Patten Tract, where there will be at least 6-9 turbines planned well within the "fly zone" of these eagles.

This picture was taken in summer 2017 while I was out on a drive in my Model T. I saw him/her about a quarter mile away, got up to 200 feet or so and stopped. I have several other pictures in sequence, of when this magnificent bird looked at me, picked up his/her dinner, and kept moving it step by step over to the field, so he/she could enjoy it and let me continue on by. Now, if THIS isn't nature at it's finest, I don't know what is! And, it needs to BE PROTECTED at ALL costs!

Another concern I have for renewable energy in general, is that currently it STILL IS NOT at a reliable enough stage to keep this construction up across the entire United States at this pace. One only needs to do the research throughout all of Europe and Canada to find out it has been an expensive mistake. Europe currently pays over twice per Kwh as we currently do in the States. I am an all electric home, in January my bill was over \$400, and with what could very well happen as in Europe, the day will come when that will be easily \$1,000, which of course I cannot pay on my current small pension. And I'm not alone in this department.

So my take on ALL this renewable energy stuff is, it needs to "go back to the drawing board" before it continues being installed only to go "belly up", or certainly cost consumers/taxpayers billions upon billions of dollars more than they can afford.

Please, stop these current projects from happening entirely. Set the standard for the country by showing the leadership to stop it until it can be proven its worth. So far, it will never compare to Nuclear, and with todays cleaner burning "standard" power plants, there's no comparison.

Thank you for your kind consideration

I am a young man in support of wind turbines and wind farms. I am a 7th generation farmer in my family. My family has farmed this land for decades and I'd love to be able to my families great history by providing clean energy, income generated for local gov't & schools. Thank you for taking the time to read. P.S. Farmers are allowed to harvest soybeans, corn, & wheat... why not the wind? I should be allowed to use my land and give back to the environment as I see fit.

Comments

This wind farm will be the worst thing to come to Huron County Lyme Twp. Property values will suffer. There are health concerns for myself & my family. Eagles & hawks that frequent our property will be in danger. The wind is NOT a viable or smart option. It will not reduce the amount of spinning reserve needed or produced from any other generation plants. Demand needs of power don't even justify the need for added generation. There are several other plants closing due to lack of demand.

Thank you for your thoughts and insights regarding this project.

I am concerned by the "general" non-specific nature of the materials you've presented. I've seen several documents from Apex which contradict each other. Tonight I heard one of your spokespeople say "there aren't that many owls in the area" and that eagles won't be adversely affected. This is not supported by the ODNR, the USFWS, or by my local observation.

Thank you for your thoughts and insights regarding this project.

Comments	
We are opposed to the wind turbine projects in our area. They are unsightly, causing visual blight to a peaceful, serene country area. They will kill or drive off the eagles that have re-established in our area. The shadow-flicker & noise generated will be a huge nuisance. All these problems are not worth the small amount of power these will generate, which will be intermittent, and needing constant back-up from the traditional power generating plants.	

Thank you for your thoughts and insights regarding this project.

Comments

I am against the wind project and putting up turbines. There are so many reasons against it. I worry about our delicate natural water supplies that run under Bellevue and it could be disastrous if this balance was disturbed. Our beautiful landscapes ruined.

Thank you for your thoughts and insights regarding this project.

Emerson Creek Wind

Oxford

Comments

I want you to know I am not in favor of the wind turbines. They will affect this area forever. Damage road, which we will have to pay to be repaired. Will affect the beautiful landscape. These turbines are ~~ugly~~ humongous. Not beautiful or effect. Will contaminate underground water. No good reason to have them.

Thank you for your thoughts and insights regarding this project.

Comments

With all the turbines that are located in the world why are you still using computer modeling. There is enough empirical evidence to determine the exact impact those turbines will have on a community. These size turbines should never be considered or allowed to be imposed on a rural community. Don't approve this project

Thank you for your thoughts and insights regarding this project.

Comments

We do not want Apex or any company to build Wind Turbines close to our home because 1. They are an eye sore 2. Not efficient 3. They cause damage to wild life and to people sensitive to frequency changes. 4. Decreasing our property value 5. It will cause our utility bills to increase. 6. We don't want them close to our home.

Thank you for your thoughts and insights regarding this project.

Comments

How much does it cost and who is paying for it? (Don't see much on facts and figures (cost to build, maintain & repair) as well as input cost compared to actual output of electricity. Just because the DOE says, "wind energy costs are lower than ever..." doesn't mean that is true. If it were truly viable it would sell itself! Not any energy-efficient choice!

Comments

I'd love to be a part of generating energy for the future.
I hate the idea of being bullied into NOT doing anything
just to appease the "angry mob!!" Land owner rights
are essential in our ideals - We will always need
more ways to generate electricity for our future generations!

Thank you for your thoughts and insights regarding this project.

Comments

I am ABSOLUTELY OPPOSED to these windmills. They should not be in this highly populated area that is already designated as an EPA protected area. The Karst region that we are living in should be reason enough to put them elsewhere. Our ground water + the sinkholes that are all connected underground are all reasons NOT to put windmills here. NO WINDMILLS!

Comments

I am strongly against the Emerson Creek Wind project. I am concerned that these turbines will affect my property value. I was unaware of this when I bought my house over 2 years ago. I have not been shown studies that this hasn't affected property values. When asked representatives from Emerson Creek,

Comments

My concern is the arguments that are based on speculation by a few. We need to use scientific studies to base our decision and use that data to provide the best information to move on this project. I know I am the minority voice! Many supporters are not voicing this because they trust in the science.

where to begin?! The birds the bats, the health issues and the fact that we would be surrounded by seven 655' turbines. Just not a good idea, to say nothing of the fact that they are not a good source of electricity.

Thank you for your thoughts and insights regarding this project.

Comments

I am against the wind turbines for many reasons. The most important is we are live in the Karst area that is supposed to be EPA protected and I am concerned it will damage our wells. I also am concerned for what this will do to our life-flight service. Please into consideration what we the residents have to say since we will be affected most by it.

Thank you for your thoughts and insights regarding this project.

Comments

My concerns are for the environmental impact with the ground water in the area. In 2009 the Bellevue area was flooded for many months due to underground streams being diverted by sink holes being filled with concrete.

Comments I am concerned with the process of handling these comments - a 3rd party attorney to get the ballots to OPSB - Being paid by APEX. I have no faith that this is a "Safe and Fair" system. Anyone Paid by APEX should NOT be handling any of these comments!

Thank you for your thoughts and insights regarding this project.

Comments _____

We have concerns about this project and feel like we are not getting answers. We are very concerned about the natural resources, and nearby wildlife. Also, how this will change our property value. We are proud to say NO! to these turbines. The negatives are greater than positives.
