Hello I am Cody Baker, a 21 year old who recently purchased my first home here in Seneca county. The reason I chose this area is for the vast wildlife and peaceful living to start a family. My property (farm with land) was signed up for wind turbines prior to me purchasing it. My address is 6208 South Cr43 Tiffin OH 44883. I reside right in the middle of where the projected turbines are supposed to go. The previous owner signed up for them being they didn't live here and I assume didn't worry about them since they didn't live here. Since then they have been sued from the wind company for a dispute over different land they own. I don't have much making me live here. I could live anywhere in the United States. I feel that if these turbines come in it will cause me to look elsewhere to raise a family and spend my life. Who would want to live by numerous 600' wind turbines. I believe there is around 20 that will all be within a mile of my home. I hope these wind turbines do not go through.

Thank you for your time.

I farm and own land in Erie, Huron, Sandusky, and Seneca counties . I own land next to land leased for the wind project. Wind turbines do not compliment working farms. They cause interruption to RTK guidance systems, interfere with aerial crop spraying, and kill bats beneficial to insect pest control. They will only slow efficiency and production. Property owners in the foot print of a wind project should have a vote in the approval process. Set backs should always be from the property line. Set backs should be greater if abut property owners do not want the project. Republic Wind LLC should not be allowed to harm any resident in the county. They do not have strong community support. Please consider the devastation this industrial wind project will do to this rural area. I live by this motto avoid avoidable harm. Please deny the Republic Wind project approval. Thank you.
