Dear Members of the Siting Board,

I am a resident of York Twp in Sandusky County. Bellevue is located @ the intersection of four counties - Seneca, Sandusky, Huron, Erie with County Seats in Tiffin, Fremont, Norwalk & Sandusky Ohio.

There are several industrial turbine projects proposed for our region which includes a lot of densely populated areas. If they are allowed to progress, the City of Bellevue will have turbines North, East & South of the City limits. This would affect the quality of life for Bellevue residents as well as many citizens in the outlying areas.

My husband & I have worked very hard to have a home in the country where we can relax in the tranquility of our country home. We wake up listening to

Hear birds chirp & see deer & rabbits playing in open fields. The thought of our peaceful world being destroyed by wind turbines breaks my heart. I don't want the roar of swooshing blades, property values decreased, Shadow flicker or infra-sound. Our lives forever changed by these monster turbines towering 590 feet & 650 ft. Changing our lives & landscape forever. What will these do to flights for loved ones in life flight?

Who benefits from these? Our cost for electricity will climb to pay for them. What about power grids?

I beg you to not permit these turbines into Seneca, Huron, Sandusky or Erie Counties. Let us learn from others who are now dealing with these turbines by not allowing them in or near our communities.

Thank you for considering the damage that can be done.

Sincerely,

Pamela & James Fitz
