Dear Sirs,

I don't know what it would take to convince you to deny the wind turbine people that they are not welcome in Ohio. We have been doing everything we can think of to get our message across. If you drive through Seneca, Erie, and Huron Counties you see the anti wind signs everywhere. Even in town. We have written letters to you and our political leaders. Confronted the wind companies. I don't believe there has ever been such opposition to anything else in Ohio ever.

The political leaders took away our zoning rights when they gave the board power over our local zoning in this situation. What ever happened to government by the people and for the people? What happened to majority rules? By far the great majority oppose the turbines but are in favor of second generation nuclear energy. We have no problem with that.

I have been on the Board of Zoning Appeals in Sherman Township, Huron County since 1986 and we try hard to keep our township as a desirable place

to live and raise a family. It has not been easy as people tend to think we have more power than we have. However, overall up to now we have a beautiful rural community. Turbines will change all that if they are not stopped.

I am a regretful lease holder and I know personally that there are a lot more lease holders that did not realize that they were basically signing their property over to the wind companies. They tell me but will not put it in writing. I will.

I signed to keep peace in the family and not force a farm sale with my siblings and the fact that we were told our farm was not suitable for a turbine anyway. Also turbines were three hundred feet high, not six hundred feet. If I had it to do over I would have taken a chance on the family argument.

Please consider the people of our state and not a greedy company from two states away that will ruin our community and take the money and leave us with the blight.

FILF

You know some day they will be like  
so many old falling down abandoned  
factories that companies just walk  
away from. There are examples of  
that all over the world.

Thank you for your time and  
consideration and please tell the  
big wind companies no.

Joseph G. Fritz
