The Great Lakes are one of the wonders of the world and enjoyed by millions. Would Arizona, Nevada or Utah approve wind turbines for their portion of the Grand Canyon? Would Montana approve turbines for Yellowstone? Would California approve wind turbines for Yosemite? Why in the world would anyone approve wind turbines for a Great Lake....our Great Lake.

This development has not been fully and satisfactorily tested for environmental concerns that are shared by the US Fish & Wildlife Service, the National Audubon Society and thousands of people in Northeast Ohio.

We urge you to require an Environmental Impact Statement prior to the approval of Project Icebreaker to ensure the health and safety of our Great Lake — Lake Erie.

Take a step back and see the big picture. We have one of the wonders of the world and all the many benefits that go with it. Please, we urge you – Do not approve the permit.

To the Ohio Power Siting Board,

I am not a scientist nor an accomplished environmentalist, just a concerned citizen that lives in Northeast Ohio and would like to address the Windmill Proposal.

Beautiful Lake Erie is a vital, precious resource that belongs to everyone regardless of status or influence. The lake is our source of life, if we proceed hastily with these windmills the consequences are irreversible.

This proposal saddens me very deeply as we are just beginning to restore the health of the lake and all the life that depends on it. There is much more to do but I feel this endeavor will be a major blow for all we have accomplished unless we carefully consider all the possible impacts this course of action will create.

Thank you for your time and consideration in this very important matter

Sharon Jaskolka
