The Procurement Process

Our core business is to provide our clients with the best procurement structure for their specific needs. This may be fixed price, heat rate index, real time, or a combination of some or all of these alternatives. It is a process that is enabled by transparency, understanding your suitability, and who best fits your needs from the provider community. The steps to this process are:

- Understanding your goals – It's naturally important to capture the lowest price, but this needs to be married to your budget constraints, what is the optimum term, your risk appetite, and other user-specific criteria that can be determined by understanding your objectives and understanding what works and what doesn't work. We will discover answers from discussions with you and they will serve as a guideline for the process, from inception through renewal and all phases in between.
- Data – We will retrieve your historical usage data, if applicable, and perform an analysis of how you use energy. We will compare history with what the forward curve offers today, and make assumptions based on real life scenarios combined with your specific needs to recommend compatible structure and term, benchmarking said assumptions with the wholesale price of power.
- Beginning the pricing process – Once we have satisfied you with what the best structure looks like, we will then send a request for pricing to those Retail Electric Providers (REPs) who can service your requirements. The competitive process will achieve the best of economy and allow an "apples to apples" comparison.
- Manage the pricing process – Receive pricing, query the various REPs as to particulars such as band width, material change, gas lock procedures (if applicable), and other details that allow meaningful comparisons and drive the best answers to your procurement.
- Execution – Once pricing for the elected structure has been reviewed and a final list of REPs arrived at, we will then insure that contract language and provisions are compatible to your needs (including negotiating for same should that be necessary) and deliver to you an executable contract vetted for price and terms.
- Continuing service – Our engagement doesn't end with execution of contract. We will continue to apprise you of issues connected to the current contract, changing market conditions (opportunities or risks beyond current procurement), and other material items.

Familiarity with the REP community, knowledge of where the market is, and experience in managing procurement in whatever structure and term required is what our value proposition is based upon.
