Redskins From XA

Wapakoneta keeper Trey Ware made a save on a Kalida shot a few minutes later to keep the margin at one goal.

With just under 23 minutes to go, Wapakoneta had a pair of shots from in close, but both were stopped.

Kalida held the advantage for the next several minutes. With 10 minutes to play, Wapakoneta was awarded a direct kick. Senior AJ Schulte's effort was deflected over the crossbar.

A final scoring chance came with about two and a half minutes left as Collin Lenhart's try went high.

Game Notes

The junior varsity game was 20 minutes in length.

Due to the very warm and muggy conditions, players were given water breaks at the midway point of each half.

Wapakoneta (1-1)

will be off until next Monday when they host Jackson Center. There will be one half of JV play starting at 5 p.m., followed by the varsity contest.

Buckeyes From XA

are receivers K.J. Hill and C.J. Saunders, running back J.K. Dobbins, and defensive linemen Chase Young and Jonathan Cooper.

"I never really visualized (becoming a captain) like I did other things," acknowledged Young, a junior who with a big season could be a first-round NFL draft pick next spring. "But when I got more into the program and more into what being a Buckeye was, I wanted to be part of that group of people who can lead a team."

By most accounts, Young is the loudest and most demonstrative among the seven. Saunders is a former walk-on who plays mostly on special teams.

STILL LOOKING

FOR BACKUP RB

One of the biggest challenges of the pre-season for Day is trying to line up a tail-back to spell Dobbins, who is expected to shoulder most of the load if he stays healthy.

Demario McCall, who was expected to be an H-back, is the most likely candidate, Day said Monday.

Master Teague was a front-runner, but he just got back on the field after an injury. Behind them are a couple of promising true freshmen.

"Demario has had a good camp," Day said. "I think there's a chance you see them all play. (But) Demario has a leg up."

ADJUSTMENT TO GRISTMILL – GEMINI 138-KV TRANSMISSION LINE PROJECT

AEP Ohio has proposed minor changes to an upcoming electric transmission project in Auglaize County, Ohio. The company announced the Wapakoneta Area Improvements Project, also known as the Gristmill-Gemini Transmission Line Project, just over a year ago. The project involves building approximately 15 miles of 138-kilovolt (KV) transmission line, building two electrical substations and expanding an existing substation. Community members and landowners provided input about the project at an open house in July 2018. After reviewing public input, the company announced a proposed route for the power line between Gristmill and Gemini substations.

We filed the proposed route, Case No. 19-0043-EL-BLN, with the Ohio Power Siting Board (OPSB) in January and received approval in April.

As the project continues to develop, AEP Ohio has recommended minor adjustments to the approved power line route.

AEP Ohio Transmission Co., Inc., a subsidiary of AEP Ohio, filed the updated power line route with the OPSB as the Adjustment to Gristmill-Gemini 138-KV Transmission Line Project, Case No. 19-1489-EL-BLN. The Letter of Notification to construct, operate and maintain this facility awaits review by the OPSB.

The project supports economic development and improves electric reliability in the area. The company expects to begin construction this fall, following OPSB approval.

The OPSB accepts motions to intervene in the Letter of Notification up to 10 days following the publication date of this notice. The requirements to intervene are available in Rule 4906-2-12 of the Ohio Administrative Code. Please address motions to Ohio Power Siting Board, 180 E. Broad St., Columbus, Ohio, 43215-3793 and cite Case No. 19-1489-EL-BLN.

The accompanying map shows the project area. Please use this map only as a general guide due to its reduced scale and limited detail. Dear Neighbor,

You're receiving this letter because public records show you own property or live in the area where AEP Ohio plans to upgrade the local power grid. I'm writing to provide an update on the Wapakoneta Area Improvements Project.

We announced the project, also known as the Gristmill-Gemini Transmission Line Project, just over a year ago. The project involves building approximately 15 miles of 138-kilovolt (kV) transmission line, building two electrical substations and expanding an existing substation. Community members and landowners provided input about the project at an open house in July 2018. We filed the proposed power line route, Case No. 19-0043-EL-BLN, with the Ohio Power Siting Board (OPSB) in January and received approval in April.

As the project continues to develop we are now proposing minor adjustments to the approved power line route between Gristmill and Gemini substations, and are filing a new Letter of Notification with the OPSB to reflect the requested changes.

We have filed the updated route with the OPSB as the Adjustment to Gristmill-Gemini 138-kV Transmission Line Project, Case No. 19-1489-EL-BLN. **Please see Page 3 of this document for key regulatory information associated with this project.**

The project supports economic development and improves electric reliability in the area. We expect to begin construction this fall, following OPSB approval.
