**RE: In the Matter of the Letter of Notification Application of The Dayton Power and Light Company
for a Certificate of Environmental Compatibility and Public Need for the Bath-Trebein
Reconductor Project
PUCO Case No. 19-1631-EL-BLN
Proof of Compliance with Ohio Administrative Code 4906-6-07 and 4906-6-08**

Dear Chairman Randazzo,

The Dayton Power and Light Company ("DP&L") hereby files this proof of compliance with the notice requirements set forth in Rules 4906-6-07 and 4906-6-08 of the Ohio Administrative Code for the above-referenced project application:

1. In accordance with OAC 4906-6-07(A)(1), DP&L served a copy of the Letter of Notification to each required chief executive officer or public agency head on October 10, 2019.
2. In accordance with OAC 4906-6-07(A)(2), DP&L served a copy of the Letter of Notification to the main public libraries on October 10, 2019.
3. In accordance with OAC 4906-6-07(A)(3), DP&L maintains on its website, information explaining how to request an electronic or hard copy of the Letter of Notification.
4. In accordance with OAC 4906-6-08(A), DP&L published public notices of the Letter of Notification in newspapers of general circulation in the project's area on October 10, 2019 and October 12, 2019.
5. In accordance with OAC 4906-6-08(B), DP&L mailed a letter describing the project to each property owner and affected tenant via first class mail on October 10, 2019.

Respectfully submitted,

ss:/ *Randall V. Griffin*

Re: **Bath-Trebein 138 kV Reconductor Project**
Service of Application on Local Public Officials
PUCO Case Number 19-1631-EL-BLN

Dear Commissioner Glaser:

The Dayton Power and Light Company (DP&L) is in the process of obtaining approval from the Ohio Power Siting Board (OPSB) for the Bath-Trebein 138 kilovolt (kV) Reconductor Project (Project) located in Beavercreek Township, Greene County, Ohio. The existing wires need to be replaced to ensure that we continue to provide reliable service along this line. The purpose of this Project is to reconductor the existing 138 kV transmission line with new 138 kV wires that connect the Bath 138 kV Substation to the Trebein 138 kV Substation. The Project also includes the replacement of four wood poles; a steel pole structure is replacing one wood pole and three other wood poles will be replaced with new wood poles in the same location. The remaining existing transmission line towers/poles will remain as is. This Project will help provide sufficient operating capacity, operational flexibility, and reliability to the metro Dayton load center which provides service to some of Dayton's largest customers. Construction is expected to start in the first quarter of 2020 and be completed by June 1, 2021.

In accordance with Ohio Administrative Code (OAC) Rule 4906-6-05, this Project falls within the OPSB's requirements for a Letter of Notification (LON) application. In compliance with OAC Chapter 4906-6-05, we have prepared and filed the attached LON application with the OPSB for their review and approval. The application includes a project description and other pertinent information.

Copies of the application have been distributed to local government officials and local public libraries.

For additional details about the OPSB and this project, please refer to the OPSB website at <https://www.opsb.ohio.gov/>. To view an electronic version of the application, search Case Number 19-1631-EL-BLN. Please contact Greg Tokar at 937-331-4314 or by email at dpltransmissionmaintenancengroup@aes.com if you have any questions about the project.

Sincerely,

The purpose of this Project is to reconductor the existing 138 kV transmission line with new 138kV wires that connect the Bath 138 kV Substation to the Trebein 138 kV Substation. The Project also includes the replacement of four wood poles; a steel pole structure is replacing one wood pole and three other wood poles will be replaced with new wood poles in the same location. The remaining existing transmission line towers/poles will remain in their current locations and will not be moved. This Project will help provide sufficient operating capacity, operational flexibility, and reliability to the metro Dayton load center which provides service to some of Dayton's largest customers. Construction is expected to start in the first quarter of 2020 and be completed by June 1, 2021.

In accordance with Ohio Administrative Code (OAC) Rule 4906-6-05, this Project falls within the OPSB's requirements for a Letter of Notification (LON) application. In compliance with OAC Chapter 4906-6-05, we have prepared and filed the attached LON application with the OPSB for their review and approval. The application includes a project description and other pertinent information.

Per requirements of OAC Rule 4906-6-05, we are providing you an electronic copy of the LON application on compact disc and one hard copy so that you can make it available to local government officials and to the public for their review upon their request.

For additional details about the OPSB and this project, please refer to the OPSB website at <https://www.opsb.ohio.gov/>. To view an electronic version of the application, search Case Number 19-1631-EL-BLN. Please contact Greg Tokar at 937-331-4314 or by email at dpltransmissionmaintenancgroup@aes.com if you have any questions about the project.

Sincerely,

Re: **Bath-Trebein 138 kV Reconductor Project**
Service of Application on Local Public Libraries
PUCO Case Number 19-1631-EL-BLN

Dear Fairborn Community Library:

The Dayton Power and Light Company (DP&L) is in the process of obtaining approval from the Ohio Power Siting Board (OPSB) for the Bath-Trebein 138 kilovolt (kV) Reconductor Project (Project) located in Beavercreek Township, Greene County, Ohio. The existing wires need to be replaced to ensure that we continue to provide reliable service along this line. The purpose of this Project is to reconductor the existing 138 kV transmission line with new 138kV wires that connect the Bath 138 kV Substation to the Trebein 138 kV Substation. The Project also includes the replacement of four wood poles; a steel pole structure is replacing one wood pole and three other wood poles will be replaced with new wood poles in the same location. The remaining existing transmission line towers/poles will remain in their current locations and will not be moved. This Project will help provide sufficient operating capacity, operational flexibility, and reliability to the metro Dayton load center which provides service to some of Dayton's largest customers. Construction is expected to start in the first quarter of 2020 and be completed by June 1, 2021.

In accordance with Ohio Administrative Code (OAC) Rule 4906-6-05, this Project falls within the OPSB's requirements for a Letter of Notification (LON) application. In compliance with OAC Chapter 4906-6-05, we have prepared and filed the attached LON application with the OPSB for their review and approval. The application includes a project description and other pertinent information.

Per requirements of OAC Rule 4906-6-05, we are providing you an electronic copy of the LON application on compact disc and one hard copy so that you can make it available to local government officials and to the public for their review upon their request.

For additional details about the OPSB and this project, please refer to the OPSB website at <https://www.opsb.ohio.gov/>. To view an electronic version of the application, search Case Number 19-1631-EL-BLN. Please contact Greg Tokar at 937-331-4314 or by email at dpltransmissionmaintenancgroup@aes.com if you have any questions about the project.

Sincerely,

A handwritten signature in black ink, appearing to read "Kathryn N. Storm".

Careers

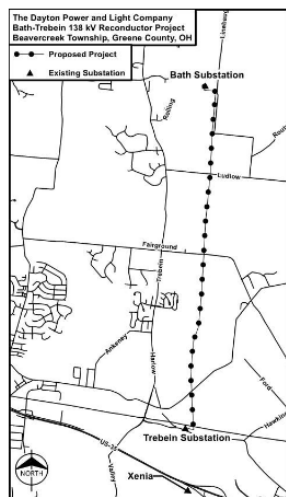

This project will provide improved grid reliability, operational flexibility, and operating capacity to the Dayton metro area by reconductoring the existing 138 kilovolt (kV) transmission that connects the Bath Substation to the Trebein Substation. Reconductoring is the process of replacing the wires on an electric circuit to allow it to carry greater electrical currents.

Specifically, the proposed project will help to prevent transmission system overloads in the Dayton metro area of the DP&L transmission system under various outage conditions, complying with mandatory Federal Energy Regulatory Commission (FERC)/ North American Electric Reliability Corporation (NERC) reliability standards.

Frequently Asked Questions

Where is the Bath-Trebein 138kV transmission line located?

The Bath-Trebein 138kV transmission line connects the Bath Substation which is located in Xenia, Greene County, Ohio to the Trebein Substation which is located in Beavercreek, Greene County, Ohio.

When will the work take place?

Estimated Project Schedule

October 2019	► File Letter of Notification Application with Ohio Power Siting Board (OPSB)
January 2020	► OPSB approval
March 2020	► Construction begins
June 2021	► Project in-service
Indicates the current project stage.	

Will electric service be interrupted?

During construction, customers should not notice interruption of their electric service. If an outage is required for a short period, the affected customer(s) will be notified before the outage to limit the inconvenience.

Where can I get more information?

Visit the OPSB website [to view the application](#) and for more information. The Case Number for DP&L's Bath-Trebein 138kV Reconduct Project is **19-1631-EL-BLN**.

To contact DP&L about the project or request an electronic copy of the application, please leave a message at [937-331-4314](tel:937-331-4314) or email dpltransmissionmaintenancegroup@aes.com. You will receive a response within 1-2 business days.

Notice of Proposed Major Utility Facility

The Dayton Power and Light Company (DP&L) is in the process of obtaining approval from the Ohio Power Siting Board (OPSB) for the Bath-Trebein 138 kilovolt (kV) Reconductor Project located in Beavercreek Township, Greene County, Ohio. The purpose of this Project is to reconductor the existing 138 kV transmission line connecting the Bath 138 kV Substation to the Trebein 138 kV Substation. The Project also includes the replacement of four wood poles, one with a new steel pole structure location and three with new wood poles installed in place within existing transmission line right-of-way or within existing substation property. The remaining existing transmission line towers/poles will remain in their current locations and will not be moved. This Project will help provide sufficient operating capacity, operational flexibility, and reliability to the metro Dayton load center which provides service to some of Dayton's largest customers.

The following public officials and agency departments have been provided a copy of the Letter of Notification (LON) Application:

- Bob Glaser, County Commissioner
- Thomas Koogler, County Commissioner
- Richard Gould, County Commissioner
- Stephanie Ann Goff, County Engineer
- Devon Shoemaker, Executive Director Greene County Regional Planning Commission
- Amanda McKay, District Administrator County Soil & Water Conservation District
- Tom Kretz, Township Trustee
- Jeff Roberts, Township Trustee
- Deborah L. Wallace, Township Trustee
- Christy Ahrens, Fiscal Officer
- Laurie Brown, Zoning Inspector/Code Enforcement Officer

The Application is available for public inspection at the Beavercreek Community Library, 3618 Dayton-

Xenia Road, Beavercreek, Ohio 45432; Fairborn Community Library, 1 E. Main Street, Fairborn, Ohio 45324; and at the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215. The OPSB phone number is 1-866-270-6772 and their general email address is contactopsb@puc.state.oh.us. Viewing an electronic version of the Application can be performed by visiting the OPSB website

<https://www.opsb.ohio.gov/>

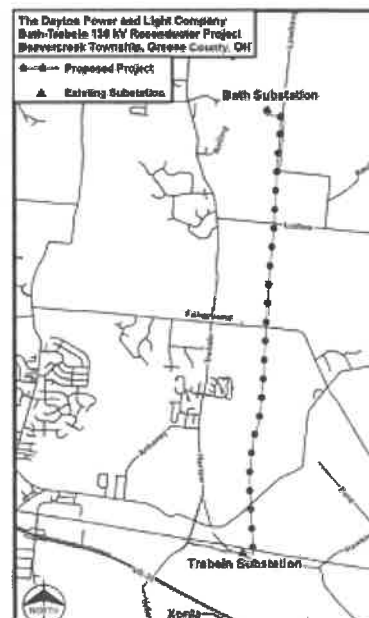

and searching by Case Number 19-1631-EL-BLN. Project information and how to request a copy of the Application can be found on the DP&L's website

FROM PAGE ONE

Patients

continued from A1

is sponsoring the bill along with Sen. Nickie Antonio, D-Lakewood.

Under the current rules, a patient might go for surgery, check ahead of time that the hospital and doctor are both in their insurance network but then two weeks later get a bill from an anesthesiologist that the patient didn't know wasn't a hospital employee.

"That's very unfair to the patient thinking 'I did my homework. I did what a good consumer is supposed should do to lower my price,'" Huffman said.

Under the proposal, when a patient receives anticipated out-of-network care, instead of billing patients for the amount insurance won't cover, the provider would work directly with the insurer.

The insurer can either pay the amount, attempt to negotiate, or if the negotiations are unsuccessful, they can go to binding arbitration. For claims under \$700, the insurer has to pay the lesser amount of either the provider's charge or the 80th percentile of all provider charges in the same or similar specialty health care service in that geographic area.

Insurance companies, hospitals and doctors have called surprise billing a problem that needs solving, but have different ideas on how best to solve the problem.

Republicans and Dem-

ocrats have both called for a policy solution and Congress is also considering a bill that would create an arbitration process to resolve surprise billing disputes. Doctor groups that contract with hospitals – and private equity groups that invest in some of these doctor groups – tend to favor creating arbitration processes as a policy solution to settle billing disputes.

Huffman said the arbitration process in his bill is designed to encourage both sides to propose a reasonable price, because the arbiter picks the proposal that seems most reasonable and doesn't split the difference. So if a doctor proposed a \$100 charge and a health plan only wanted to pay \$50, the arbiter would have to pick one of the prices and couldn't decide \$75 was most fair.

In New York, which has an arbitration process, Huffman said sometimes the doctor wins and sometimes the insurance plan wins.

Loren Adler, associate director with the USC-Brookings Schaeffer Initiative for Health Policy, reviewed the bill and said its arbitration proposal would help some patients avoid surprise balance bills, but only by greatly inflating those costs and shifting them into everyone's health insurance premiums because it ties payment to provider charges. Charges are the sticker price, which Adler said "tend to be extremely high and are largely untethered

by market forces."

"If a bill like this passed into law in Ohio, you'd likely be looking at a few percentage point increase in commercial insurance premiums statewide," Adler said.

Adler said the precise impact will depend on how arbiters in the state interpret what he called unclear guidance.

"But for bills under \$700, the law seems clear that it would require insurers (and, in turn, consumers and employers through premiums) to pay out-of-network providers either their full billed charge (like a list price) or the 80th percentile of charges in the market," Adler said. "For reference, the 80th percentile of charges in a market tends to be 3 or 4 times higher than average in-network payment rates."

Adler said he thinks providers will either pull out-of-network to collect higher payments or insurers will start offering higher in-network payment rates since providers will have more leverage.

Miranda Motter, president and CEO of Ohio Association of Health Plans, which represents health insurers, said the group opposes the bill.

"SB 198 does not protect Ohioans from higher health care costs. Rather, the legislation will merely shift surprise medical bills to surprise premium bills," Motter said.

Kroger

continued from A1

appointed in the decision by Kroger to close this store. We understand this was a business decision. However, the Northridge community is recovering from the Memorial Day tornado and this comes at a very vulnerable time for the community," said Kris McClintick, Harrison Twp. administrator.

One of the hardest hit areas during the Memorial Day tornado outbreak, an EF4 tornado ripped through the Northridge community leaving a major path of destruction. Less than two miles south of Kroger, dozens of buildings and homes were damaged, including a Grocery Lane store which remains closed.

The nearest open grocery store is a Save-A-Lot on Main Street about 2.5 miles away. There are also two Dixie Food Mart small convenience stores within a mile.

McClintick and the rest of the township's leadership just learned of the closure Friday morning and "will be assessing the impact from a community and economic development perspective," he told the Dayton Daily News.

Kroger owns the Needmore store but there was

no information available about future plans for the real estate.

Keno Hampton has been shopping at the Needmore Road store for 20 years. She buys food for two St. Vincent de Paul rehab houses, she said.

"I'm really hurt because I thought they were doing wonderful. The people are great. I just don't understand why they're doing this," Hampton said.

Hampton said she won't shop at the Siebenthaler Kroger, which is nearly four miles from the Needmore Road location. That will leave her traveling to Vandalia to buy groceries, she said.

"I'm very upset. Very, very upset. This is a good store. The people are wonderful here," Hampton said.

The store has 108 employees who were notified of the closure Friday. All will be offered other positions within the Kroger stores, Rolfes said.

Other customers, like David Wright, were disappointed in the news, but understood.

"Obviously I'm disappointed that they're shutting the store," Wright said. "It seems like it's always busy. Customers in and out doesn't always tell the balance sheet so I understand that. They

have to do what they have to do."

Wright said he supports Kroger and will continue shopping at either the Vandalia store, which is about seven miles from Needmore, or Siebenthaler.

The West Siebenthaler Avenue Kroger is currently undergoing significant renovation, which the Dayton Daily News first reported in July. That store will have a grand reopening Nov. 15, Rolfes said.

The largest regional grocery provider confirmed earlier this month that it is laying off hundreds, including managers at its family of stores, which also includes Harris Teeter, Ralphs and Fred Meyer.

Dayton-area Kroger stores employ more than 8,000 of the companies 443,000 full-time and part-time workers.

"Store divisions operate independently but all of them are taking steps to ensure they have the right talent in the right store leadership positions," a spokesperson said earlier this month. "Beyond that we generally do not comment on personnel matters related to the Kroger family of companies."

Re: **Construction Notice**
Bath-Trebein 138 kV Reconductor Project
PUCO Case Number 19-1631-EL-BLN
Parcel: XXXX

Dear Mr./Ms. XXXXXX:

The Dayton Power and Light Company (DP&L) is in the process of obtaining approval from the Ohio Power Siting Board (OPSB) for the Bath-Trebein 138 kilovolt (kV) Reconductor Project (Project) located in Beavercreek Township, Greene County, Ohio. The existing wires need to be replaced to ensure that we continue to provide reliable service along this line. The purpose of this Project is to reconductor the existing 138 kV transmission line with new 138 kV wires that connect the Bath 138 kV Substation to the Trebein 138 kV Substation. The Project also includes the replacement of four wood poles; a steel pole structure is replacing one wood pole and three other wood poles will be replaced with new wood poles in the same location. The remaining existing transmission line towers/poles will remain in their current locations and will not be moved. This Project will help provide sufficient operating capacity, operational flexibility, and reliability to the metro Dayton load center which provides service to some of Dayton's largest customers. Construction is expected to start in the first quarter of 2020 and be completed by June 1, 2021.

In accordance with Ohio Administrative Code (OAC) Rule 4906-6-05, this Project falls within the OPSB's requirements for a Letter of Notification (LON) Application. These rules also require the applicant to provide potentially affected property owners with notice of the Project and that the LON Application is pending before the OPSB. The Project has been assigned Case Number 19-1631-EL-BLN. Therefore, this letter is being sent to you, in compliance with OAC Rule 4906-6-05, to inform you of the Project.

The LON Application contains a description of the Project, and can be viewed at the following locations:

- Beavercreek Community Library, 3618 Dayton-Xenia Road, Beavercreek, Ohio 45432
- Fairborn Community Library, 1 E Main St, Fairborn, Ohio 45324

A copy of the Application is also available for public inspection at the offices of the OPSB, c/o Public Utilities Commission of Ohio, Utilities Department, 12th Floor, Borden Building, 180 East Broad Street, Columbus, Ohio 43215-3793, or on the website of the OPSB: <https://www.opsb.ohio.gov/>. To view an electronic version of the application, search Case Number 19-1631-EL-BLN. In addition, DP&L maintains a website (<https://www.dpandl.com/About-DPL/Reliability/Transmission-Improvements/>), which provides the public information about the Project and how to request a copy of the LON.

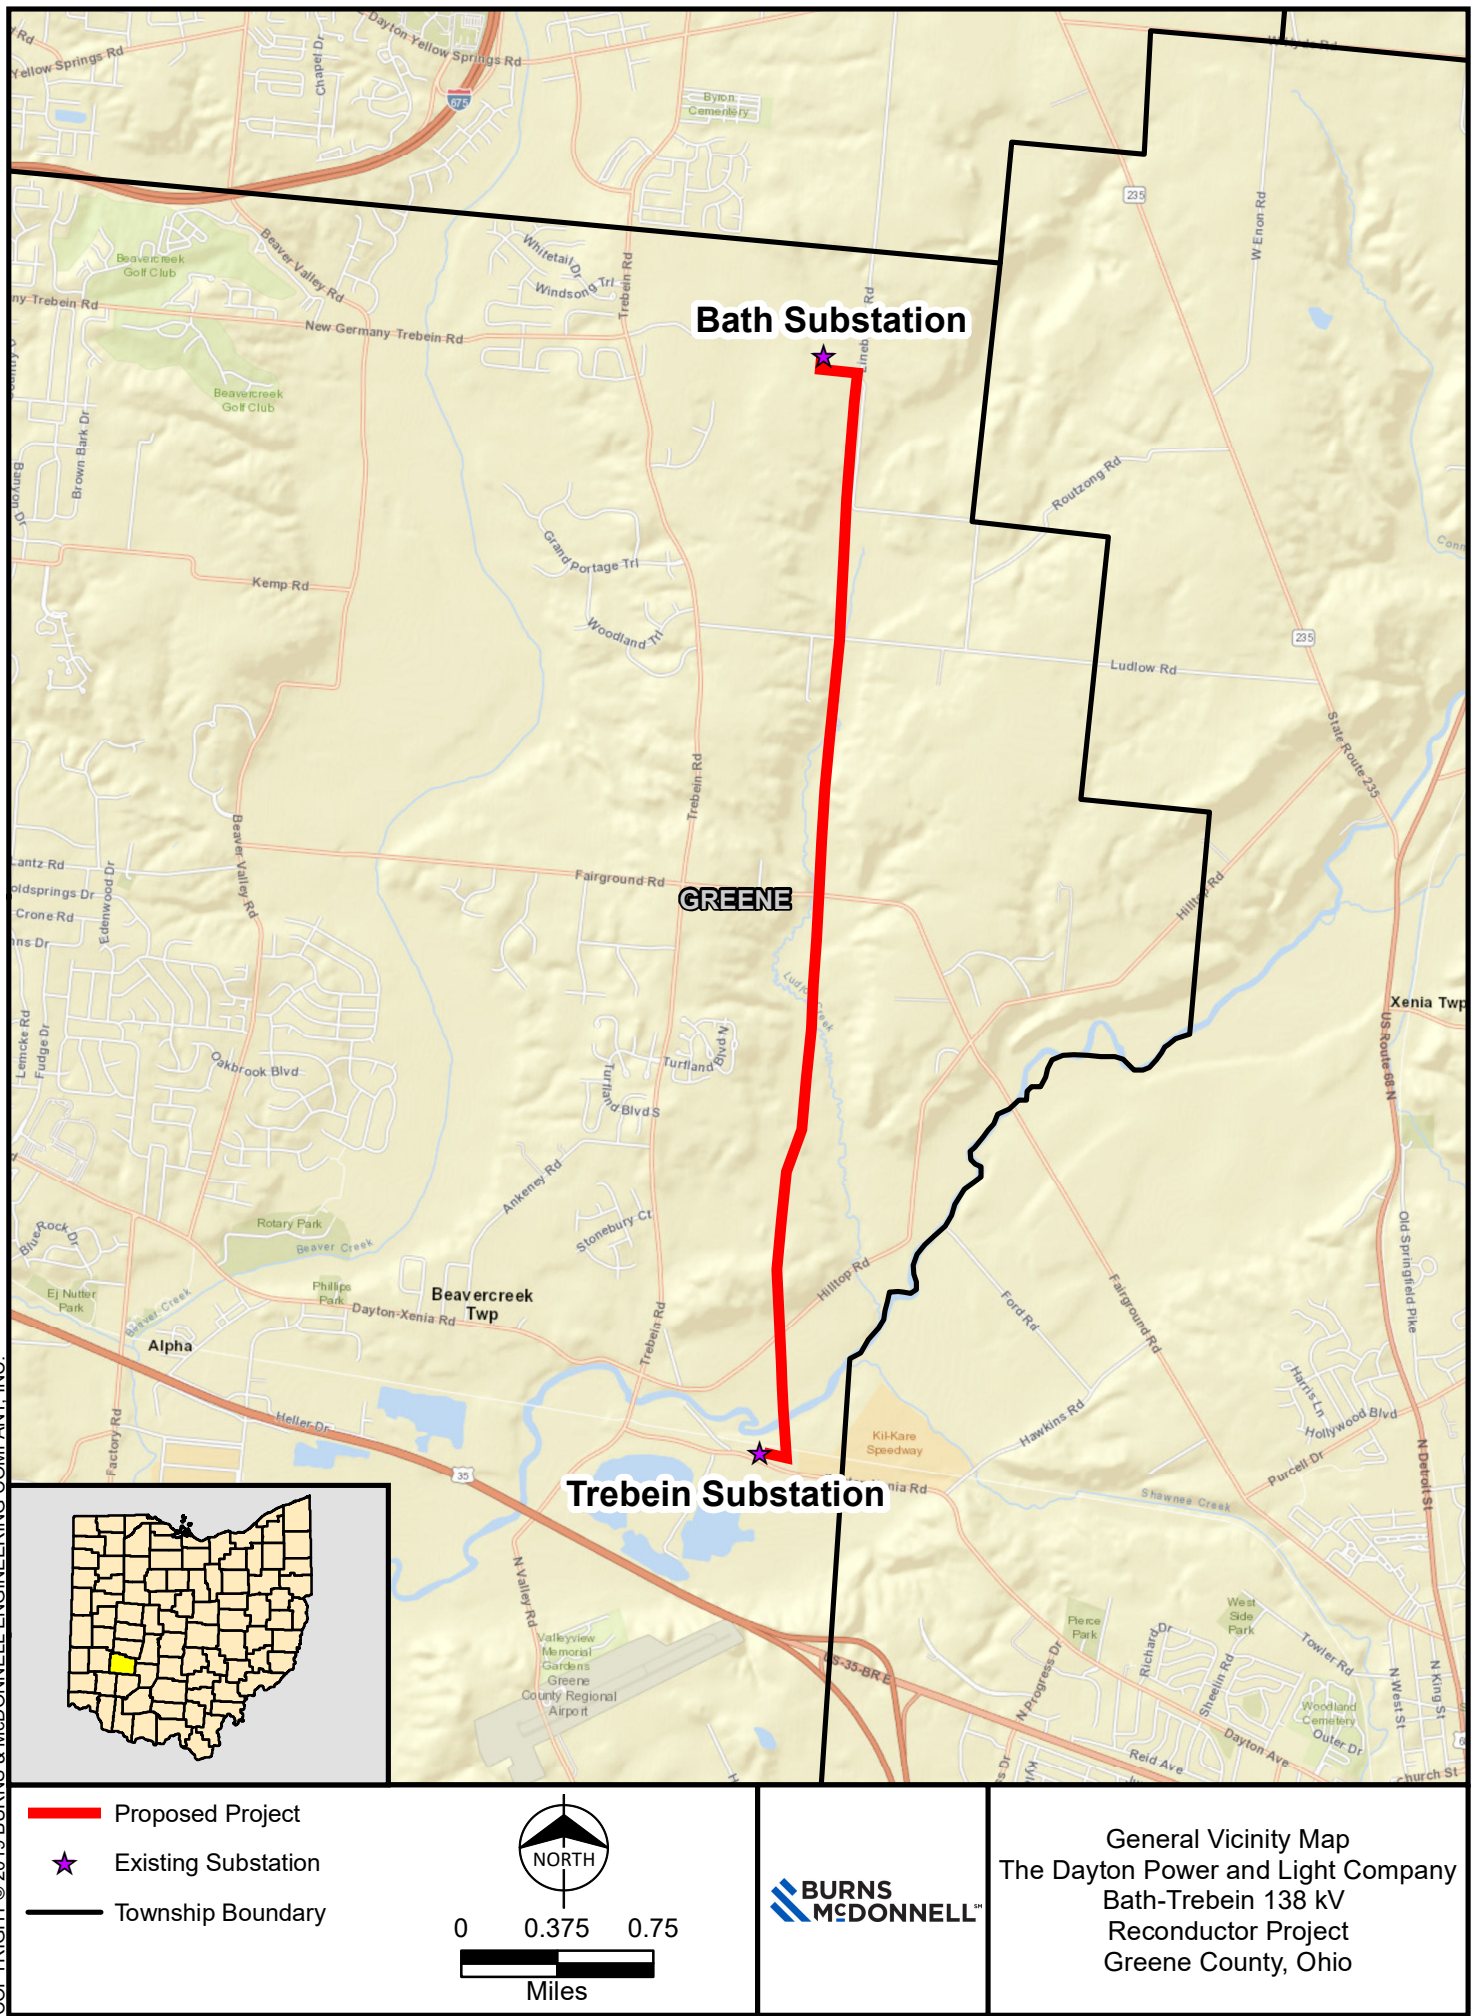

In accordance with OAC Rule 4906-6-08(A)(6), please be advised that interested persons may file motions to intervene and/or file comments with the OPSB within 10 days of the date of the publication of the public notice of the filing of this Project with the OPSB, as required by OAC Rule 4906-2-12, or later if good cause is shown. Petitions to intervene and comments should be addressed to the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215-3793 and reference Case No. 19-1631-EL-BLN.

Please contact Greg Tokar at 937-331-4314 or by email at dpltransmissionmaintenancegroup@aes.com if you have any questions about the project.

Sincerely,

A handwritten signature in black ink, appearing to read "Kathryn N. Storm", is written over the printed name.

Kathryn N. Storm
Director T&D Asset Management, AES U.S. Utilities Operations
