RE: Long Ridge Energy Generation LLC – Letter of Notification Submittal
Long Ridge Main Line
OPSB Case No. 19-1742-GA-BLN

Dear <NAME>:

Long Ridge Energy Generation LLC (“Long Ridge”) is planning to construct a new 12-inch steel natural gas pipeline in Monroe County.

PROJECT DESCRIPTION

Long Ridge is planning to construct an approximately 9,963 foot, 12-inch natural gas pipeline to deliver gas from an existing natural gas gathering system in Monroe County, OH, to its natural gas fired electric generation plant located on State Route 7 north of Hannibal, OH. A map depicting the location of the proposed project location is attached to this letter.

OHIO POWER SITING BOARD – LETTER OF NOTIFICATION SUBMISSION

The Letter of Notification (“LON”) has been filed with the Ohio Power Siting Board (“OPSB”) and is currently pending. The LON asks the OPSB for authority to construct the pipeline described above. This project was assigned Case No. 19-1742-GA-BLN.

LOCATION AVAILABLE TO VIEW LON

The LON submittal is available for viewing at the following locations:

Library: Monroe County Public Library, 96 Home Avenue, Woodsfield, OH 43793

Long Ridge website: <http://www.longridgeenergy.com/business/power-plant-project>

PUCO Website: <http://dis.puc.state.oh.us/CaseRecord.aspx?CaseNo=19-1742-GA-BLN>

HOW TO PARTICIPATE AND COMMENT

If you would like to participate and comment in the board’s proceedings, you may file a motion to intervene and/or file comments in this matter within ten (10) days from publication in the *Monroe County Beacon*. For motions to intervene, please follow the requirements of Ohio Administrative Code Rule 4906-2-12. The intervention rule is available online at www.opsb.ohio.gov.

<CITY, STATE ZIP>

RE: Long Ridge Energy Generation LLC – Letter of Notification Submittal
Long Ridge Main Line
OPSB Case No. 19-1742-GA-BLN

To whom it may concern:

As indicated in a prior letter, Long Ridge Energy Generation LLC (“Long Ridge”) is planning to construct a new 12-inch steel natural gas pipeline in Monroe County.

PROJECT DESCRIPTION

Long Ridge is planning to construct an approximately 9,963 foot, 12-inch natural gas pipeline to deliver gas from an existing natural gas gathering system in Monroe County, OH, to its natural gas fired electric generation plant located on State Route 7 north of Hannibal, OH. A map depicting the location of the proposed project location is attached to this letter.

CONSTRUCTION SCHEDULE

Long Ridge anticipates construction of the pipeline to begin on or around March 2020. Construction is expected to last through May 2021.

RESTORATION

After completion of construction, Long Ridge will restore the affected property to its pre-construction condition as soon as weather allows. Long Ridge expects that all restoration activities will be completed by May 2021.

TENANTS

If you have tenants occupying this property, please advise them of this project.

QUESTIONS OR COMPLAINTS

If you have any questions or complaints during construction and/or restoration, please contact Long Ridge’s main office at (724) 416-5534. Long Ridge will make every effort to respond to your questions/complaints in a timely manner and resolve any issues relating to the project.

Sincerely,

LONG RIDGE ENERGY GENERATION LLC

MEMORANDUM

TO: Nick Konchar, Project Manager
FROM: Amanda Zuckerman, Archaeologist
DATE: October 10, 2019
PROJECT NAME: EHP418_000 Pipeline
SUBJECT: Cultural Resources Desktop Study

PROJECT NO.: 102502114

RETTEW conducted a review of the Ohio Historic Preservation Office (OHPO) Online Mapping System GIS files for the EHP418_000 Pipeline project area and the immediate vicinity. The objective of this effort was to identify recorded historic properties (buildings, structures, sites, districts, or objects listed or eligible for listing in the National Register of Historic Places) or recorded cultural resources within the proposed project area or within 1 mile of the proposed project.

The file review concluded that there are no historic properties recorded within 1 mile of the proposed project. The file review identified two above-ground resources, mapped 185 feet west, and 0.12 miles northeast of the northern terminus of the proposed project, neither of which have been evaluated for NRHP eligibility. There are three Ohio Genealogical Society (OGS) cemeteries recorded within 1 mile of the proposed project. The Mount Vernon Cemetery is approximately 50 feet west of the proposed project and is mapped with high location confidence. The cemetery is visible on aerial imagery on a ridgetop immediately east of the proposed project, which is planned on an adjacent parcel within an existing utility corridor. The other two cemeteries are 0.67 miles northeast and 0.83 miles north of the northern terminus of the proposed project. Seven archaeological surveys have been completed, and no archaeological sites are recorded, within 1 mile of the proposed EHP418_000 Pipeline.

The project as currently planned will avoid the Mount Vernon Cemetery. No other recorded historic properties or cultural resources will be impacted by the project, and no avoidance measures are recommended.

Preliminary research was completed as an initial step in compliance with Federal and state laws that consider effects to significant cultural resources, including historic resources and archaeological sites. Federal and state mandates for cultural resources include: Section 106 of the National Historic Preservation Act of 1966 (as amended); Executive Order 11593; the National Environmental Policy Act of 1969; and the Ohio Revised Code Section 149.51 through 149.54.

U.S. FISH AND WILDLIFE SERVICE CORRESPONDENCE

September 4, 2019

Ms. Patrice M. Ashfield
Field Office Supervisor
U.S. Fish and Wildlife Service
Ohio Ecological Services Field Office
4625 Morse Road, Suite 104
Columbus, OH 43230

RE: Species Impact Review
EHP418_000 Pipeline
Equitrans Midstream, LLC
Ohio Township, Monroe County, OH
RETTEW Project No. 102502114

Dear Ms. Ashfield:

RETTEW Associates, Inc. conducted an online database search on behalf of Equitrans Midstream, LLC (Equitrans) for federally listed threatened, endangered, and special concern species within Monroe County, Ohio for the EHP418_000 Pipeline project area. The results indicate that the federally endangered Indiana bat (*Myotis sodalis*) and the federally threatened northern long-eared bat (*Myotis septentrionalis*) may occur within Monroe County. Further coordination with the Ohio Department of Natural Resources is also being conducted.

The proposed project is located in Ohio Township, Monroe County, Ohio and appears on the New Martinsville, OH U.S. Geological Survey (USGS) 7.5-minute quadrangle (**Figure 1**). The proposed project involves the construction of one maximum 12-inch natural gas well line that will transport natural gas between an existing pipeline valve and a processing facility. The majority of the proposed route follows an existing pipeline right-of-way. Planned impacts to aquatic resources or forested areas will be minimized to the greatest extent possible. Any required tree clearing will take place within the 70.55-acre requested review area between October 1 and March 31.

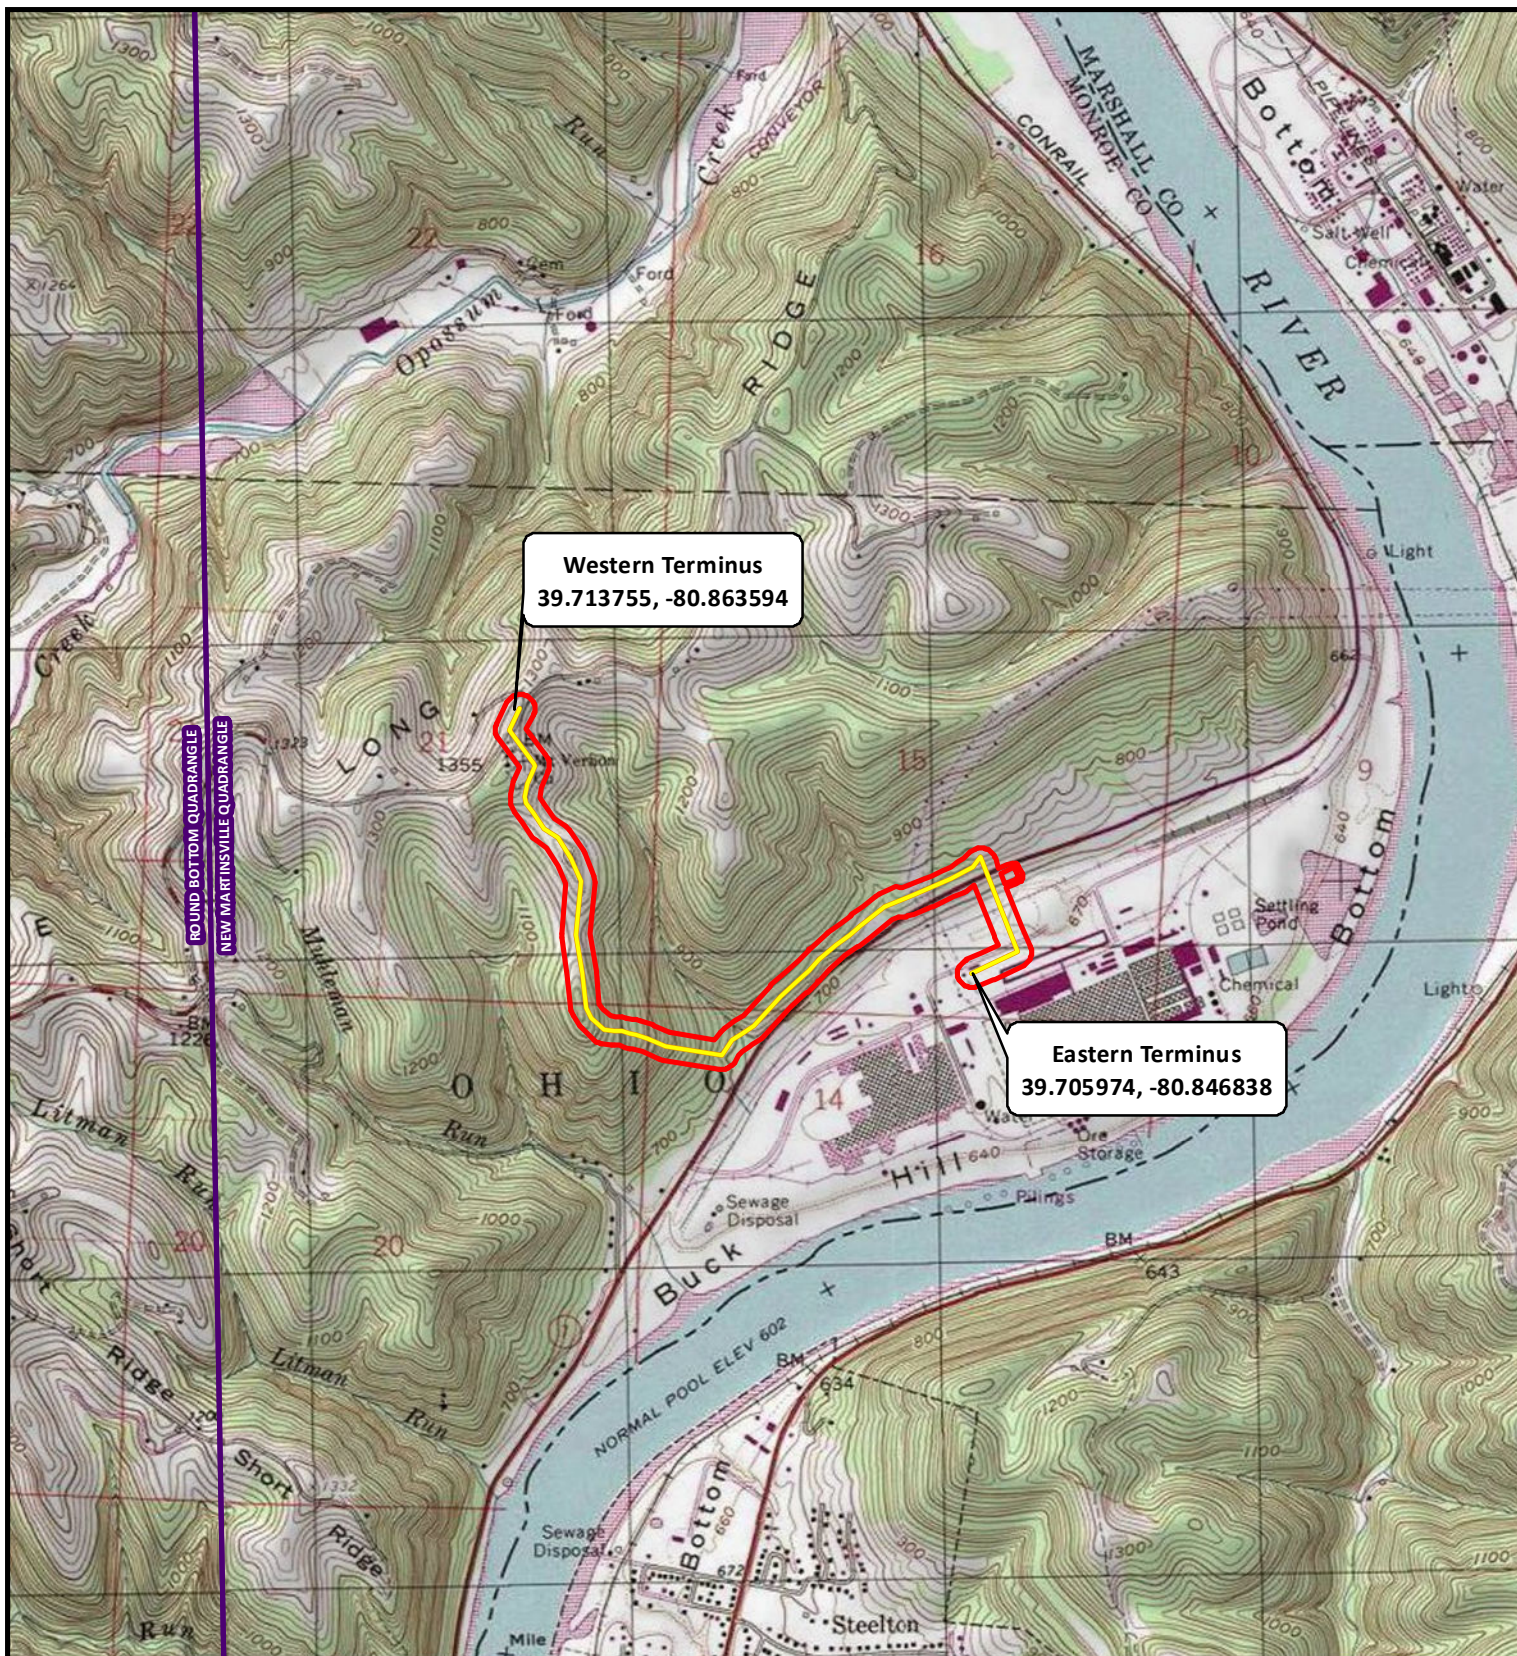

We are requesting that you review the enclosed mapping and conduct a search of your database to determine the potential presence of listed threatened or endangered species or their habitat under your jurisdiction within the requested review area. Thank you in advance for your assistance with this request. Should you have any questions or need additional information, please contact me at (412) 275 – 2213 or at sam.zelenka@rettew.com

Sincerely,

Samantha C. Zelenka

(404) 416-8993 / FAX (404) 6-9554

This message originated from outside your organization

TAILS# 03E15000-2019-TA-1921

Dear Ms. Zelenka,

We have received your recent correspondence regarding potential impacts to federally listed species in the vicinity of the above referenced project. There are no federal wilderness areas, wildlife refuges or designated critical habitat within the vicinity of the project area. We recommend that proposed activities minimize water quality impacts, including fill in streams and wetlands. Best management practices should be utilized to minimize erosion and sedimentation.

FEDERALLY LISTED, PROPOSED, AND CANDIDATE SPECIES COMMENTS: Due to the project type, size, location, and the proposed implementation of seasonal tree cutting (clearing of trees 3 inches diameter at breast height between October 1 and March 31) to avoid impacts to the federally listed endangered Indiana bat (*Myotis sodalis*) and threatened northern long-eared bat (*Myotis septentrionalis*), we do not anticipate adverse effects to any federally endangered, threatened, proposed or candidate species. Should the project design change, or during the term of this action, additional information on listed or proposed species or their critical habitat become available, or if new information reveals effects of the action that were not previously considered, consultation with the U.S. Fish and Wildlife Service (Service) should be initiated to assess any potential impacts.

If there is a federal nexus for the project (e.g., federal funding provided, federal permits required to construct), no tree clearing should occur on any portion of the project area until consultation under section 7 of the Endangered Species Act (ESA), between the Service and the federal action agency, is completed. We recommend that the federal action agency submit a determination of effects to this office, relative to the Indiana bat and northern long-eared bat, for our review and concurrence.

These comments have been prepared under the authority of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.), ESA, and are consistent with the intent of the National Environmental Policy Act of 1969 and the Service's Mitigation Policy. This letter provides technical assistance only and does not serve as a completed section 7 consultation document. We recommend that the project be coordinated with the Ohio Department of Natural Resources due to the potential for the project to affect state listed species and/or state lands. Contact John Kessler, Environmental Services Administrator, at (614) 265-6621 or at john.kessler@dnr.state.oh.us.

If you have questions, or if we can be of further assistance in this matter, please contact our office at (614) 416-8993 or ohio@fws.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Patrice M. Ashfield". The signature is stylized with a large, looped "P" and "A".

Re: 19-764; EHP418_000 Pipeline - Equitrans Midstream, LLC

Project: The proposed project involves the construction of one maximum 12-inch natural gas well line that will transport natural gas between an existing pipeline valve and a processing facility.

Location: The proposed project is located in Ohio Township, Monroe County, Ohio.

The Ohio Department of Natural Resources (ODNR) has completed a review of the above referenced project. These comments were generated by an inter-disciplinary review within the Department. These comments have been prepared under the authority of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.), the National Environmental Policy Act, the Coastal Zone Management Act, Ohio Revised Code and other applicable laws and regulations. These comments are also based on ODNR's experience as the state natural resource management agency and do not supersede or replace the regulatory authority of any local, state or federal agency nor relieve the applicant of the obligation to comply with any local, state or federal laws or regulations.

Natural Heritage Database: The Natural Heritage Database has the following records at or within a one-mile radius of the project area:

Threehorn wartyback (*Obliquaria reflexa*), T
Tippecanoe darter (*Etheostoma tippecanoe*), T
Channel darter (*Percina copelandi*), T
River darter (*Percina shumardi*), T

The review was performed on the project area you specified in your request as well as an additional one-mile radius. Records searched date from 1980. This information is provided to inform you of features present within your project area and vicinity.

Please note that Ohio has not been completely surveyed and we rely on receiving information from many sources. Therefore, a lack of records for any particular area is not a statement that rare species or unique features are absent from that area. Although all types of plant communities have been surveyed, we only maintain records on the highest quality areas.

Statuses are defined as: E = state endangered; T = state threatened; P = state potentially threatened; SC = state species of concern; SI = state special interest; A = species recently added to state inventory, status not yet determined; X = presumed extirpated in Ohio; FE = federal endangered, FT = federal threatened, FSC = federal species of concern, FC = federal candidate species.

Fish and Wildlife: The Division of Wildlife (DOW) has the following comments.

The DOW recommends that impacts to streams, wetlands and other water resources be avoided and minimized to the fullest extent possible, and that best management practices be utilized to minimize erosion and sedimentation.

The project is within the range of the Indiana bat (*Myotis sodalis*), a state endangered and federally endangered species. The following species of trees have relatively high value as potential Indiana bat roost trees to include: shagbark hickory (*Carya ovata*), shellbark hickory (*Carya laciniosa*), bitternut hickory (*Carya cordiformis*), black ash (*Fraxinus nigra*), green ash (*Fraxinus pennsylvanica*), white ash (*Fraxinus americana*), shingle oak (*Quercus imbricaria*), northern red oak (*Quercus rubra*), slippery elm (*Ulmus rubra*), American elm (*Ulmus americana*), eastern cottonwood (*Populus deltoides*), silver maple (*Acer saccharinum*), sassafras (*Sassafras albidum*), post oak (*Quercus stellata*), and white oak (*Quercus alba*). Indiana bat roost trees consists of trees that include dead and dying trees with exfoliating bark, crevices, or cavities in upland areas or riparian corridors and living trees with exfoliating bark, cavities, or hollow areas formed from broken branches or tops. However, Indiana bats are also dependent on the forest structure surrounding roost trees. If suitable habitat occurs within the project area, the DOW recommends trees be conserved. If suitable habitat occurs within the project area and trees must be cut, the DOW recommends cutting occur between October 1 and March 31. If suitable trees must be cut during the summer months, the DOW recommends a net survey be conducted between June 1 and August 15, prior to any cutting. Net surveys should incorporate either nine net nights per square 0.5 kilometer of project area, or four net nights per kilometer for linear projects. If no tree removal is proposed, this project is not likely to impact this species.

The project is within the range of the Ohio lamprey (*Ichthyomyzon bdellium*) a state endangered fish, the channel darter (*Percina copelandi*), a state threatened fish, the Tippecanoe darter (*Etheostoma tippecanoe*), a state threatened fish, and the river darter (*Percina shumardi*), a state threatened fish. The DOW recommends no in-water work in perennial streams from April 15 through June 30 to reduce impacts to indigenous aquatic species and their habitat. If no in-water work is proposed in a perennial stream, this project is not likely to impact these or other aquatic species.

The project is within the range of the eastern hellbender (*Cryptobranchus alleganiensis alleganiensis*), a state endangered species and a federal species of concern. Due to the location, and that there is no in-water work proposed in a perennial stream of sufficient size to provide suitable habitat, this project is not likely to impact this species.

Due to the potential of impacts to federally listed species, as well as to state listed species, we recommend that this project be coordinated with the U.S. Fish & Wildlife Service.

Water Resources: The Division of Water Resources has the following comment.

The local floodplain administrator should be contacted concerning the possible need for any floodplain permits or approvals for this project. Your local floodplain administrator contact information can be found at the website below.

http://water.ohiodnr.gov/portals/soilwater/pdf/floodplain/Floodplain%20Manager%20Community%20Contact%20List_8_16.pdf

ODNR appreciates the opportunity to provide these comments. Please contact Sarah Tebbe, Environmental Specialist, at (614) 265-6397 or Sarah.Tebbe@dnr.state.oh.us if you have questions about these comments or need additional information.
