Att Chairman Randazzo

Sam,

You have no doubt become the number one pen pal of Western Ohio and perhaps haven't had a chance to get into the weeds of every letter. I have excerpted a few highlights from the barrage of bundled letters on behalf of Ice Breaker that a law firm placed on the public record:

"write to you today to

reiterate our support of this innovative, first-of-its-kind economic driver for Ohio and the Great Region"

"Icebreaker Wind

will give Ohio's substantial manufacturing base an opportunity to participate in and lead a new, high-growth industry estimated at \$50 billion nationwide."

"

more than 500 jobs are expected to be created, and its economic impact is projected to be \$253 million"

"Finally, we support the health and environmental benefits of this project as well: it will reduce air pollution, improve public health, and help to mitigate climate change."

Sam typically the support winds up with a few kind words about the so-called moral imperative behind this 40 year climate fear campaign. Ask yourself is there air pollution, is public health affected by climate in any way, have there been any out of the ordinary climate driven problems needing "mitigation"?

Of course politicians support job creation but in the long run private enterprise and the market are the real job creators. Up here in Buffalo there is top down driven Tesla 750 million site looking for tenants. The whole climate infrastructure market is the child of government experts with the private sector there for a profit margin based on subsidy and tax breaks.

Sam two professors, a Dane and an Israeli, have unraveled the climate change knot. CO2 is innocent of all charges. In fact there are no charges.

These men have discovered

the naturally occurring drivers of earths climate. The ideologically driven climate fear brigade has been neutralized by the very science they have pretended to represent.

Dr. Henrik Svensmark, DTU Space and Professor Amir Shaviv, The Hebrew University of Jerusalem
