Experience & Plans

Associates, partners and advisers of Smart Columbus Energy (SCE) have decades of experience in contracting with customers across different industries, including electricity. SCE builds strong relationships between energy suppliers and their customers and will advocate and assure customers receive the best value for their needs.

SCE leverages its ability to build large coalitions to scale buying power to ultimately create high value, competitively priced, clean energy for its customers. Without the ability to scale buying power, clean energy is not financially feasible for many companies and organizations. With SCE, customers are able to access pricing for clean energy from Ohio assets they otherwise would not receive on their own. SCE also provides a simple, turn-key solution for companies to purchase electricity from assets in Ohio and in turn, meet many of their carbon reporting and environmental, social, and governance goals, without the high transaction costs associated with procuring clean power directly from project developers.

SCE will offer advisory services in regard to clean energy procurement to customers. SCE will provide guidance to customers on any incentives or disincentives from a financial or regulatory perspective.

SCE's team has a longstanding history of working through complex issues with corporate partners, and is prepared to solve any issues, however unlikely, that occur.
