I have been closely following the comments on the Emerson Creek Wind project and I vehemently object to the form letters from people living 50 to 60 miles away from this project. Number one, these are form letters distributed by Apex Clean Energy that require the writer to just fill in their names and addresses. These people are not anywhere near the area surrounding this project and they are not "knowledgeable" about this project. Apex has distributed these form letters to people as far away as 100+ miles from this project, including college campuses. This is why we need a local vote on these community destructive wind farms. Only then will you have the true numbers of the people who oppose or are in favor of these projects. And I do live in the footprint of Emerson Creek Wind Farm and I will be surrounded in all four directions by the 650+ foot tall turbines from Emerson Creek and Republic Wind.
