<p>I am writing to you today to ask you to please take a moment to submit your opposition to the Icebreaker wind turbine project on Lake Erie. The Ohio Power Siting Board issued approval for this project with 33 criteria that must be met. LEEDCO, the entity behind this project, has appealed this decision and the hearing is THIS THURSDAY.</p> <p>Time is truly running out on this issue. If you care at all about the lake I ask you to please follow the links below. We have made it very easy for you to connect to the OPSB site by following the LET YOUR VOICE BE HEARD link below, copy and paste the text (or use your own, just be sure to include the case number), select the Electrical Industry, and submit. We must implore the OPSB to hold strong on their decision.</p> <p>Alternatively, you can also link to OPSB here: https://puco.ohio.gov/wps/portal/gov/puco/help-center/contact-us</p> <p>Use the statement below, or write your own- just include the CASE number</p> <p>Reference case number: 16-1871-EL-</p>

<p>Sticking with your decision on 16-1871-EL-BGN will keep our lake in its natural state. I have been an avid fan and user of lake Erie since I was 5 years old. My family and now my grandkids have all learned how to enjoy and respect her. Construction of windmills will disturb the lakes beautiful landscape and the fishing we love so much. Please do not change your mind, putting windmills in our beautiful lake Erie is a mistake.</p> <p>Thank you</p>	Alan Zatik

Reference case number: 16-1871-EL-BGN Wind turbines are a ploy to undermine our constitution. At the utmost, combined with solar, they can produce 03% of our energy needs, thus gutting industry in America. They use rare minerals from China which are NOT renewable. They compromise our Air Force in protecting us. They wear out before they are paid for. They are toxic to people living nearby. Wind mills are bankrupting Spain--guess they didn't learn from Don Quijote. They are \$200 times as expensive as fossil fuel energy. There are many other arguments against wind turbines, many public by now. This is a prime example of federal politically correct bullshit, destroying our American way of life. Quit!	Edward J. Mike

<p>We do not need to industrialize Lake Erie. We as sport fisherman have already been cut off at the knees on bag limits and at the same time allowing tonnage increases to commercial fisheries. <p>I am opposed to building wind turbines in Lake Erie. <p>16-1871-EL-BGN Lake Erie is Ohio's most important single natural resource. It should not be a massive industrial electrical turbine site, especially since it would not benefit Ohio, or Ohio jobs or Ohio investors. <p>Regarding case number 16-1871-EL-BGN. I am strongly opposed to building wind farms in Lake Erie and the IceBreaker project. Regarding case # 16-1871-EL-BGN. I strongly and adamantly oppose the Icebreaker Wind project. Ice breaker may have problems with ice shove. See you tube "Lake Erie ice ridge" Ontario Hydro.	
I am totally opposed to the LEEDCO wind turbine project in Lake Erie. Relying on wind as a stable source of power in northeastern Ohio is a fantasy and could never be more efficient than clean nuclear power. Ohio and U.S. taxpayers should NOT be forced to subsidize a foreign corporation that wants to profit from cluttering up our Great Lake, endangering bird life, raising our electric rates and reducing our standard of living with unsightly wind turbines.
