---

To the Ohio Power Siting Board:

My name is Léna Koskinen, and I am a student at the Ohio State University. I am writing this email regarding the proposed OSU Gas Plant. This proposal has gone unnoticed by many students, faculty members, staff, and other members of the university community. To allow for more voices from the university community to be heard, a third hearing should be held during the academic year. Important and impactful decisions such as this one should not be announced during summer term when members of the university community are less attentive to issues regarding the university.

Because of the "green" initiatives promoted by the university for students to take part in, the university should also take part in "green" initiatives and not allow a natural gas plant to be built on campus. The university needs to practice what it preaches to students. Therefore, the board should reject this proposal outright and favor a proposal that utilizes renewable energy.

Regards,  
Léna Koskinen, a concerned OSU student
