

**BEFORE
THE PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the Rushmore)	
Energy, LLC 2019 Renewable Portfolio)	Case No. 20-0753-EL-ACP
Standard Status Report)	

Staff Findings and Recommendations

I. Statutory Background

Amended Substitute Senate Bill 221, of the 127th General Assembly (2008 Ohio Laws S221, effective July 31, 2008), established Ohio's renewable portfolio standard (RPS) applicable to electric distribution utilities and electric service companies. The RPS is addressed principally in Ohio Revised Code (R.C.) 4928.64, with relevant resource definitions also contained within R.C. 4928.01(A).

According to R.C. 4928.64(B)(2), the compliance obligations for **2019** are as follows:

- Renewable Energy Resources = **5.50%** (includes solar requirement)
- Solar Energy Resources = **0.22%**

The Public Utilities Commission of Ohio (PUCO or Commission) further developed rules to implement the Ohio RPS, contained within Ohio Administrative Code (Ohio Adm.Code) 4901:1-40.

Ohio Adm.Code 4901:1-40-05(A), states:

Unless otherwise ordered by the commission, each electric utility and electric services company shall file by April fifteenth of each year, on such forms as may be published by the commission, an annual renewable energy portfolio status report analyzing all activities undertaken in the previous calendar year to demonstrate how the applicable renewable energy portfolio benchmarks have been met. Staff shall conduct annual compliance reviews with regard to the benchmarks under the renewable energy portfolio standard.

Ohio Adm.Code 4901:1-40-05(C), states:

Staff shall review each electric utility's or electric services company's renewable energy portfolio status report and any timely filed comments, and file its findings and recommendations and any proposed modifications thereto.

The findings and recommendations in this document pertain to the company's compliance status. This document does not address such matters as cost recovery or status relative to the statutory 3% cost provision.

II. Company Filing Summarized

Rushmore Energy, LLC (Rushmore or Company) filed its RPS compliance status report for the 2019 compliance year on April 15, 2020. In its compliance filing, Rushmore proposed a baseline of 81,330 megawatt-hours (MWHs) which it indicated was its Ohio retail electric sales for 2019. Applying the statutory benchmarks to its proposed baseline, Rushmore calculated its 2019 compliance obligations to be as follows:

- 179 Solar MWHs
- 4,294 Non-Solar¹ MWHs

The Company indicated that it had obtained the necessary renewable energy credits (RECs) and solar RECs (S-RECs) to satisfy its 2019 compliance obligations. The Company further indicated that it had transferred RECs and S-RECs to its PJM EIS Generation Attribute Tracking System (GATS) reserve subaccount for Ohio compliance purposes.

III. Filed Comments

No persons filed comments in this proceeding.

IV. Staff Findings

Following its review of the Company's annual status report, other relevant compliance materials, and any timely comments submitted in this proceeding, Staff makes the following findings:

¹ Staff uses "non-solar" in this context to refer to the total renewable requirement net of the specific solar carve-out. Staff acknowledges that there is not a specific "non-solar" requirement in the applicable statute.

- (1) Rushmore was an electric services company in Ohio with retail electric sales in the state of Ohio during 2019, and therefore the Company had an RPS obligation for 2019.²
- (2) The baseline proposed by the Company is reasonable, and given the proposed baseline and the 2019 statutory benchmarks, Rushmore accurately calculated its RPS compliance obligations.
- (3) The Company has transferred 181 S-RECs and 4,292 RECs to its GATS reserve subaccount for 2019 Ohio compliance purposes. The Company retired 2 more S-RECs than necessary to satisfy its solar obligation, with those excess S-RECs applied to its overall renewable obligation.
- (4) Following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its non-solar obligation for 2019. The RECs that the Company transferred to its GATS reserve subaccount were sourced from generating facilities certified by the Commission and were of appropriate vintages.
- (5) Following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its solar obligation for 2019. The S-RECs that the Company transferred to its GATS reserve subaccount were sourced from solar generating facilities certified by the Commission and were of appropriate vintages.

V. Staff Recommendations

Following its review of the information submitted in this proceeding and other relevant data, Staff recommends that Rushmore is found to have satisfied its 2019 RPS compliance obligations. Staff further recommends that this annual compliance status report be automatically approved consistent with Ohio Adm.Code 4901:1-40-05(D).

² Rushmore was certified to provide power marketer services in Ohio during 2019; see PUCO Case No. 14-1808-EL-CRS.
