Subject: Union County Solar Projects

In reference to case 20-1405-EL-BGN : Union Solar
To whom it may concern:

We are very much opposed to the proposed Cadence solar project in Union County. We are a residential/agricultural community. We have lived in Union county for over forty years. This is where we raised four children. We are a community that cares about the greater good of those who live here and are fighting to preserve the well-being of our homes, our families and our land. Is the Union County Solar project the best use of the land for the hard working, tax paying citizens of this community? Will the families and businesses of Union county benefit from the energy produced by this project? No !! The company states it will be funneled to other states. It is the surrounding landowners who are the most adversely impacted by this, since home values will depreciate. What effect will the toxins produced do to our environment and wildlife ? Why do the solar companies only lease the land, instead of buying the land ? Because, when the time has expired, the land is contaminated with toxins, such as cadmium and lead, and no longer suitable for profitable farming. We would ask that you will give consider moving this project to a more remote and suitable location in the state. Please help us preserve the fertile farm land that is needed to produce the food that feeds a nation. Do this for our children and our grandchildren. We have everything to lose !!
Tax paying citizens, Mike and Yvonne Hammond
