Here is screenshots of the location of the windmills access roads along with where they are positioned. Also, contacted a Latty Township trustee on FB and asked him about it and he confirmed they were access roads for the windmill project. I am including a screenshot of our brief conversation as an attachment.

I live in Grover Hill and I was wondering what they are putting in just outside the southeast side of town.

Off of what street or road

You can now message and call each other and see info like Active Status and when you've read messages.

Head east on 114 from township building right after Scott Miller has his trucks park at. In the field behind there.

Windmill access drive

Oh okay, I didn't know they were going that far. So are they planning on putting more up that way?

Looking like it but nothing is finalized yet

Ok. I just noticed a mound out there and I was just wondering what to expect here near town.

Here is another windmill location I found. There are a total of 3 on the south end of Grover Hill that has been started. I am working with Chase Dunderman, Alicia and Steve Gilbert on this. We haven't looked to the northwest and northeast part of the township due to snow that came in over the weekend here.Wanted to update you on another location. There are two pictures attached to help you with the location.

Thanks,
Gin Hinchcliff
