To Whom it May Concern:

I am writing this letter to you today concerning some property that I own in Highland County, Ohio. It concerns the solar energy that is planned for that area. My family has lived in Highland county since 1960 and we own approximately 500 acres and we have signed up with interbred in the Palomino division for this solar energy on our property. Highland county and especially the area we're talking about has just gone down and down through the years and the income that the solar would bring is much needed in this area. The closest little town to our property is Lynchburg, Ohio and in the last 47 years that my wife and I have been married we have seen that little town go to nothing.

There have been a lot of people moving here from big cities to get away from the city and they are fighting this tooth and nail. It is my hopes that this letter to you will bring attention to how much this area needs the solar system to come through not only for the energy it will produce but with the money that it will bring to the community as well.

Amazon is located in Clinton County, which is the next county over from Highland. They have said that they will leave in 2025 if they do not get green power available to them. After losing airborne there in Clinton County is so important that we try to keep Amazon for the jobs it produces.

I hope you look into this matter with open eyes to see the benefit that this could bring Highland county. Thank you in advance for any and all help. Yours truly, Ted Jackson

Ted Jackson
