

**BEFORE
THE OHIO POWER SITING BOARD**

In the Matter of the Application of **Juliet**)
Energy Project, LLC for a Certificate of)
Environmental Compatibility and Public Need) Case No. 20-1760-EL-BGN
for a Solar Facility Located in Wood County,)
Ohio.)

JOINT STIPULATION AND RECOMMENDATION

I. INTRODUCTION

Applicant Juliet Energy Project, LLC (“Juliet” or “Applicant”), Ohio Farm Bureau Federation (“OFBF”) and Staff of the Ohio Power Siting Board (“OPSB Staff”) who represent the parties to this proceeding, submit this Joint Stipulation and Recommendation (“Joint Stipulation”) for adoption by the Ohio Power Siting Board (“Board” or “OPSB”). Ohio Administrative Code (“O.A.C.” or “Ohio Adm. Code”) 4901-1-30 provides that any two or more parties to a proceeding may enter into a written stipulation covering the issues presented in such a proceeding. The purpose of this document is to set forth the understanding and agreement of the parties who have signed below (“Parties” or in the singular “Party”), and to recommend that the Board approve and adopt this Joint Stipulation as part of its Opinion, Order, and Certificate in this proceeding, resolving all matters raised by the OPSB Staff pertinent to the approval and construction of Juliet Solar Farm, a 101 megawatt (“MW”) solar-powered electric facility in Weston and Milton Townships, Wood County, Ohio and its associated facilities (“Project” or “Facility”).

This Joint Stipulation is supported by adequate data and information; represents a just and reasonable resolution of issues in this proceeding; violates no regulatory principle or precedent;

and is the product of lengthy, serious bargaining among knowledgeable and capable Parties in a cooperative process to resolve all of the issues in this proceeding.

The Parties have engaged in settlement discussions related to the topics raised in this proceeding. This Joint Stipulation represents the culmination of these discussions, and the Parties acknowledge that this agreement is amply supported by the record and thus entitled to careful consideration by the Board. Accordingly, the Parties recommend that the Board issue a Certificate of Environmental Compatibility and Public Need for the Facility.

II. JOINT STIPULATION AND RECOMMENDATION

A. Recommended Conditions

The Parties recommend that the Board approve Juliet's Application subject to the conditions in the Staff Report of Investigation issued on August 24, 2021 as listed below.

- (1) The Applicant shall install the facility, utilize equipment and construction practices, and implement mitigation measures as described in the application and as modified and/or clarified in supplemental filings, replies to data requests, and recommendations in this Staff Report of Investigation.
- (2) The Applicant shall conduct a preconstruction conference prior to the commencement of any construction activities. Staff, the Applicant, and representatives of the primary contractor and all subcontractors for the project shall attend the preconstruction conference. The conference shall include a presentation of the measures to be taken by the Applicant and contractors to ensure compliance with all conditions of the certificate, and discussion of the procedures for on-site investigations by Staff during construction. Prior to the conference, the Applicant shall provide a proposed conference agenda for Staff review and shall file a copy of the agenda on the case docket. The Applicant may conduct separate preconstruction conferences for each stage of construction.
- (3) Within 60 days after the commencement of commercial operation, the Applicant shall submit to Staff a copy of the as-built specifications for the entire facility. If the Applicant demonstrates that good cause prevents it from submitting a copy of the as-built specifications for the entire facility within 60 days after commencement of commercial operation, it may request an extension of time for the filing of such as-built specifications. The Applicant shall use reasonable efforts to provide as-built drawings in both hard copy and as geographically referenced electronic data.
- (4) Separate preconstruction conferences may be held for the different phases of civil construction and equipment installation. At least 30 days prior to each preconstruction

conference, the Applicant shall submit to Staff, for review and acceptance, one set of detailed engineering drawings of the final project design for that phase of construction and mapping in the form of PDF, which the Applicant shall also file on the docket of this case, and geographically referenced data (such as shapefiles or KMZ files) based on final engineering drawings to confirm that the final design is in conformance with the certificate. Mapping shall include the limits of disturbance, permanent and temporary infrastructure locations, areas of vegetation removal and vegetative restoration as applicable, and specifically denote any adjustments made from the siting detailed in the application. The detailed engineering drawings of the final project design for each phase of construction shall account for geological features and include the identity of the registered professional engineer(s), structural engineer(s), or engineering firm(s), licensed to practice engineering in the state of Ohio who reviewed and approved the designs. All applicable geotechnical study results shall be included in the submission of the final project design to Staff.

- (5) At least 30 days prior to the preconstruction conference, the Applicant shall provide to Staff, for review and acceptance, the final geotechnical engineering report. This shall include a summary statement addressing both the geologic and soil suitability.
- (6) The certificate shall become invalid if the Applicant has not commenced a continuous course of construction of the proposed facility within five years of the date of journalization of the certificate unless the Board grants a waiver or extension of time.
- (7) As the information becomes known, the Applicant shall file on the public docket the date on which construction will begin, the date on which construction was completed, and the date on which the facility begins commercial operation.
- (8) Prior to the commencement of construction activities in areas that require permits or authorizations by federal or state laws and regulations, the Applicant shall obtain and comply with such permits or authorizations. The Applicant shall provide copies of permits and authorizations, including all supporting documentation, to Staff within seven days of issuance or receipt by the Applicant and shall file such permits or authorizations on the public docket. The Applicant shall provide a schedule of construction activities and acquisition of corresponding permits for each activity at the preconstruction conference.
- (9) The certificate authority provided in this case shall not exempt the facility from any other applicable and lawful local, state, or federal rules or regulations nor be used to affect the exercise of discretion of any other local, state, or federal permitting or licensing authority with regard to areas subject to their supervision or control.
- (10) At least 30 days prior to the start of construction the Applicant shall file a final version of the complaint resolution plan on the public docket. At least seven days prior to the start of construction and at least seven days prior to the start of facility operations, the Applicant shall notify via mail affected property owners and tenants including those individuals who were provided notice of the public informational meeting, residences located within one mile of the project area, parties to this case, county commissioners, township trustees, emergency responders, airports, schools, and libraries, as well as anyone who has requested updates regarding the project. These notices shall provide information about the

project, including contact information and a copy of the complaint resolution plan. The start of construction notice shall include written confirmation that the Applicant has complied with all preconstruction-related conditions of the certificate, as well as a timeline for construction and restoration activities. The start of facility operations notice shall include written confirmation that the Applicant has complied with all construction-related conditions of the certificate, as well as a timeline for the start of operations. The Applicant shall file a copy of these notices on the public docket. During the construction and operation of the facility, the Applicant shall file on the public docket a complaint summary report by the fifteenth day of April, July, October, and January of each year through the first five years of operation. The report shall include a list of all complaints received through the Applicant's complaint resolution process, a description of the actions taken toward the resolution of each complaint, and a status update if the complaint has yet to be resolved.

- (11) At least 30 days prior to the preconstruction conference, the Applicant shall submit its emergency response plan to Staff for review and acceptance and shall file it on the public docket. That plan shall include a provision(s) to keep the affected source water protection area designees informed of the status of any spills, significant panel damage, and repair/clean-up schedule.
- (12) The facility shall be operated in such a way as to assure that no more than 101 megawatts would be injected into the Bulk Power System at any time.
- (13) The Applicant shall not commence any construction of the facility until it has executed an Interconnection Service Agreement and Interconnection Construction Service Agreement with PJM Interconnection, which includes construction, operation, and maintenance of system upgrades necessary to integrate the proposed generating facility into the regional transmission system reliably and safely. The Applicant shall docket in the case record a letter stating that the Agreement has been signed or a copy of the executed Interconnection Service Agreement and Interconnection Construction Service Agreement.
- (14) Prior to commencement of construction, the Applicant shall submit to Staff for approval a solar panel perimeter fence type that is both small-wildlife permeable and aesthetically fitting for a rural location. This condition shall not apply to substation fencing.
- (15) Prior to commencement of any construction, the Applicant shall prepare a landscape and lighting plan in consultation with a landscape architect licensed by the Ohio Landscape Architects Board that addresses the aesthetic and lighting impacts of the facility with an emphasis on any locations where an adjacent non-participating parcel contains a residence with a direct line of sight to the project area. The plan shall also address potential aesthetic impacts to nearby communities, the travelling public, and recreationalists by incorporating appropriate landscaping measures such as shrub plantings or enhanced pollinator plantings. The plan shall include measures such as fencing, vegetative screening, or good neighbor agreements. Unless alternative mitigation is agreed upon with the owner of any such adjacent, non-participating parcel containing a residence with a direct line of sight to the fence of the facility, the plan shall provide for the planting of vegetative screening designed by the landscape architect to enhance the view from the residence and be in harmony with the existing vegetation and viewshed in the area. The Applicant shall

maintain vegetative screening for the life of the facility and the Applicant shall replace any failed plantings so that, after five years, at least 90 percent of the vegetation has survived. The Applicant shall maintain all fencing along the perimeter of the project in good repair for the term of the project and shall promptly repair any damage as needed. Lights shall be motion-activated and designed to narrowly focus light inward toward the facility, such as being downward facing and/or fitted with side shields. The Applicant shall provide the plan to Staff and file it on the public docket for review and confirmation that it complies with this condition.

- (16) General construction activities shall be limited to the hours of 7:00 a.m. to 7:00 p.m., or until dusk when sunset occurs after 7:00 p.m. Impact pile driving shall be limited to the hours between 9:00 a.m. and 6:00 p.m. Impact pile driving may occur between 7:00 a.m. and 9:00 a.m., and after 6:00 p.m. or until dusk when sunset occurs after 6:00 p.m., if the noise impact at non-participating receptors is not greater than daytime ambient Leq plus 10 dBA. If impact pile driving is required between 7:00 a.m. and 9:00 a.m., and after 6:00 p.m. or until dusk when sunset occurs after 6:00 p.m., the Applicant shall install a noise monitor in a representative location to catalog that this threshold is not being exceeded. Hoe ram operations, if required, shall be limited to the hours between 10:00 a.m. and 4:00 p.m., Monday through Friday. Construction activities that do not involve noise increases above ambient levels at sensitive receptors are permitted outside of daylight hours when necessary. The Applicant shall notify property owners or affected tenants within the meaning of Ohio Adm.Code 4906-3-03(B)(2) of upcoming construction activities including potential for nighttime construction.
- (17) If the inverters or substation transformer chosen for the project have a higher sound power output than the models used in the noise model, the Applicant shall show that sound levels will not exceed the daytime ambient level plus five dBA at any nonparticipating sensitive receptor and will be submitted at least 30 days prior to construction. If noise data is not available from the inverter or transformer manufacturer, an operational noise test may be performed to comply with this condition. The test must be performed on a sunny day between 10 a.m. and 2 p.m. in the months of May-August, at a distance equal to the minimum distance from an inverter to a non-participating residence. If the test shows the operational noise level is greater than project area ambient Leq level plus five dBA additional noise mitigation will be required. This condition is complied with if the test shows the operational noise level is equal or less than project area ambient Leq level plus five dBA. The Applicant shall file a report on the public docket that shows either 1) for the chosen inverter and substation transformer that sound levels will not exceed the daytime ambient level plus five dBA at any non-participating sensitive receptor or 2) results of the operational noise test showing that sound levels will not exceed the daytime ambient level plus five dBA at any non-participating sensitive receptor.
- (18) The Applicant shall avoid, where possible, or minimize to the extent practicable, any damage to functioning field tile drainage systems and soils resulting from the construction, operation, and/or maintenance of the facility in agricultural areas. Damaged field tile systems shall be promptly repaired or rerouted to at least original conditions or modern equivalent at the Applicant's expense to ensure proper drainage. However, if the affected landowner agrees to not having the damaged field tile system repaired, they may do so

only if the field tile systems of adjacent landowners remain unaffected by the nonrepair of the landowner's field tile system.

- (19) The Applicant shall ensure that benchmark conditions of surface and subsurface drainage systems are documented prior to construction, including the location of laterals, mains, grassed waterways, and county maintenance/repair ditches. The Applicant will make efforts to conduct a perimeter dig utilizing a tile search trench and consult with owners of all parcels adjacent to the property, the county soil and water conservation district, and the county to request drainage system information over those parcels. The Applicant shall consult with the county engineer for tile located in a county maintenance/repair ditch.
- (20) When repairing tiles in a county maintenance/repair ditch, the Applicant shall give reasonable notice of such repairs to the county engineer and Staff. The county engineer or his/her representative shall have the right to visually inspect and approve the repair work performed prior to backfill. If the county engineer does not approve the repair work in a timely manner, Staff shall have the right to visually inspect and approve the repair work performed prior to backfill. If the opinion of the county engineer and the opinion of Staff on approval of the repair work differ, Staff shall have the final authority to approve the repair work.
- (21) The Applicant shall adhere to seasonal cutting dates of October 1 through March 31 for the removal of trees three inches or greater in diameter to avoid impacts to Indiana bats, Northern Long-eared bats, Little Brown bats, and Tricolored bats, unless coordination with the Ohio Department of Natural Resources (ODNR) and the U.S. Fish and Wildlife Service (USFWS) allows a different course of action. If coordination with these agencies allows tree clearing between April 1 and September 30, the Applicant shall docket proof of completed coordination on the case docket prior to clearing trees.
- (22) The Applicant shall contact Staff, the ODNR, and the USFWS within 24 hours if state or federally listed species is encountered during construction activities. Construction activities that could adversely impact the identified plants or animals shall be immediately halted until an appropriate course of action has been agreed upon by the Applicant, Staff and the appropriate agencies.
- (23) If the Applicant encounters any new listed plant or animal species or suitable habitat of these species prior to construction, the Applicant shall include the location in the final engineering drawings and associated mapping, as required in condition 4. The Applicant shall avoid impacts to these species and explain how impacts would be avoided during construction.
- (24) The Applicant shall construct the facility in a manner that incorporates post construction stormwater management under OHC00005 (Part III.G.2.e, pp. 19-27) in accordance with the Ohio Environmental Protection Agency's Guidance on Post-Construction Storm Water Controls for Solar Panel Arrays.
- (25) The Applicant shall conduct no in-water work in perennial streams from April 15 through June 30 to reduce impacts to aquatic species and their habitat, unless coordination with the ODNR reflects a different course of action. If coordination with the ODNR allows in-water

work in perennial streams from April 15 through June 30, the Applicant shall file proof of such coordination on the case docket prior to conducting such in-water work in perennial streams.

- (26) The Applicant shall take steps to prevent establishment and/or further propagation of noxious weeds identified in Ohio Adm.Code Chapter 901:5-37 during implementation of any pollinator-friendly plantings as well as during construction, operation, and decommissioning. This would be achieved through appropriate seed selection, and annual vegetative surveys. If noxious weeds are found to be present, the Applicant shall remove and treat them with herbicide as necessary.
- (27) Prior to commencement of construction activities that require transportation permits, the Applicant shall obtain all such permits. The Applicant shall coordinate with the appropriate authority regarding any temporary road closures, road use agreements, driveway permits, lane closures, road access restrictions, and traffic control necessary for construction and operation of the proposed facility. Coordination shall include, but not be limited to, the county engineer, the Ohio Department of Transportation, local law enforcement, and health and safety officials. The Applicant shall detail this coordination as part of a final traffic plan submitted to Staff prior to the preconstruction conference for review and confirmation by Staff that it complies with this condition. The Applicant shall update the traffic plan with any transportation permits received after the preconstruction conference.
- (28) At least 30 days prior to the preconstruction conference, the Applicant shall provide the status (i.e., avoidance, mitigation measures, or capping) of each water well within the project area. The Applicant shall indicate to Staff whether the nearest solar components to each uncapped well within the project area meets or exceeds any applicable minimum isolation distances outlined in Ohio Adm.Code 3701-28-07 and denote the well on construction drawings. The Applicant shall relocate the solar equipment at least 50 feet from that water well, demonstrate that the well is for nonpotable use and relocate solar equipment at least 10 feet from that well, or seal and abandon the water well. The Applicant shall also verify that any abandoned water wells within the project area have been properly decommissioned.
- (29) At least 30 days prior to the preconstruction conference, the Applicant shall submit an updated decommissioning plan and total decommissioning cost estimate without regard to salvage value on the public docket that includes: (a) a provision that the decommissioning financial assurance mechanism include a performance bond where the company is the principal, the insurance company is the surety, and the Ohio Power Siting Board is the obligee; (b) a timeline of up to one year for removal of the equipment; (c) a provision to monitor the site for at least one additional year to ensure successful revegetation and rehabilitation; (d) a provision where the performance bond is posted prior to the commencement of construction; (e) a provision that the performance bond is for the total decommissioning cost and excludes salvage value; (f) a provision to coordinate repair of public roads damaged or modified during the decommissioning and reclamation process; (g) a provision that the decommissioning plan be prepared by a professional engineer registered with the state board of registration for professional engineers and surveyors; and (h) a provision stating that the bond shall be recalculated every five years by an engineer retained by the Applicant.

- (30) At the time solar panel end of life disposal, retired panels marked for disposal shall be sent to an engineered landfill with various barriers and methods designed to prevent leaching of materials into soils and groundwater. Nothing in this condition shall prevent Juliet from recycling panels as possible and appropriate.

B. Exhibits

Subject to the terms and conditions of this Joint Stipulation, the Applicant and OPSB Staff agree, stipulate, and recommend that the following exhibits submitted to this docket be marked and admitted into the record of this proceeding, and that cross-examination is waived thereon:

1. Applicant Exhibit 1, the Application, filed on March 12, 2021 and Amendment to the Application, filed August 10, 2021, with all exhibits thereto (collectively known as “the Application”);
2. Applicant Exhibit 2, Proof of Service of the Application Amendment on local public officials and libraries as filed on August 11, 2021;
3. Applicant Exhibit 3, Applicant’s Responses to Staff’s First, Second, Third and Fourth Data Requests issued, as filed on May 5, May 14, July 13, August 2 and August 4 2021;
4. Applicant Exhibit 4, Proof of Service of the Application on local public officials and libraries as filed on May 28, 2021;
5. Applicant Exhibit 5, a copy of a letter sent to property owners and tenants within the plan site or contiguous to the plan site on January 6, 2021 announcing that the Public Informational Meetings would be held on January 20, 2021;
6. Applicant Exhibit 6, Proofs of Publication filed on July 27 and August 31, 2021 in accordance with Ohio Revised Code Section (“R.C. 4906.06(C) for the first and second publications of the description of the application and the hearing dates, published on July 22 and August 26, 2021 in the *Sentinel-Tribune*;
7. Applicant Exhibit 7, SHPO concurrence letter filed on May 5, 2021;
8. Applicant Exhibit 8, the “Direct Testimony of Cliff Scher” filed on September 13, 2021.
9. Joint Exhibit 1, this “Joint Stipulation and Recommendation” signed on behalf of the Applicant, OFBF, and OPSB Staff;
10. OPSB Staff Exhibit 1, “Staff Report of Investigation,” issued on August 24, 2021; and

11. OPSB Staff Exhibit 2, the “Prefiled Testimony of Grant Zeto,” filed on September 17, 2021.

C. Other Terms and Conditions

This Stipulation is conditioned upon adoption of the Stipulation by the Board in its entirety and without material modification. Each Signatory Party has the right, in its sole discretion, to determine whether the Board’s approval of this Stipulation constitutes a “material modification” thereof. If the Board rejects or materially modifies all or any part of this Stipulation, any Signatory Party shall have the right to apply for rehearing. If the Board does not adopt the Stipulation without material modification upon rehearing, or if the Board makes a material modification to any Order adopting the Stipulation pursuant to any reversal, vacation and/or remand by the Supreme Court of Ohio, then within thirty (30) days of the Board's Entry on Rehearing or Order on Remand any Signatory Party may withdraw from the Stipulation by filing a notice with the Board ("Notice of Withdrawal"). No Signatory Party shall file a Notice of Withdrawal without first negotiating in good faith with the other Signatory Parties to achieve an outcome that substantially satisfies the intent of the Stipulation. If a new agreement achieves such an outcome, the Signatory Parties will file the new agreement for Board review and approval. If the discussions to achieve an outcome that substantially satisfies the intent of the Stipulation are unsuccessful, and a Signatory Party files a Notice of Withdrawal, then the Board will convene an evidentiary hearing to afford that Signatory Party the opportunity to contest the Stipulation by presenting evidence through witnesses, to cross examine witnesses, to present rebuttal testimony, and to brief all issues that the Board shall decide based upon the record and briefs. If the discussions to achieve an outcome that substantially satisfies the intent of the Stipulation are successful, then some or all of the Signatory Parties shall submit the amended Stipulation to the Board for approval after a hearing if necessary.

III. FINDINGS

The Parties agree that the record in this case, provided the Board approves the conditions in this Joint Stipulation, contains sufficient probative evidence for the Board to find and determine, as findings of fact and conclusions of law, that:

A. **Findings of Fact**

1. The Facility qualifies as a “major utility facility” defined in R.C. 4906.01(B)(1)(c).
2. Applicant formally submitted its Application for Certificate of Environmental Compatibility and Public Need on March 12, 2021.
3. On May 28, 2021, Applicant filed a copy of the Proof of Service of the Application on local public officials and libraries.
4. On August 10, 2021, Applicant formally submitted its Amendment of its pending accepted, complete application changing the identification of the developer of the Project from 7X Energy, Inc. to Lightsource bp Renewable Energy Investments Limited under a Development Services Agreement with BP Alternative Energy North America Inc.
5. On August 11, 2021, Applicant filed a copy of the Proof of Service of the Application on local public officials and libraries.
6. On July 27, 2021 and August 31, 2021, Applicant filed a copy of the Proofs of Publication in accordance with O.A.C. 4906-3-09 and 4906-3-10 for the publication of the description of the Application and the hearing dates in the *Sentinel-Tribune*.
7. The Staff Report was filed on August 24, 2021.
8. The Administrative Law Judge, by Entry dated July 7, 2021, ordered that any stipulation entered into by the parties shall be filed by no later than 12:00 p.m. on September 21, 2021.
9. Adequate data on the project has been provided to determine the nature of the probable environmental impact as required by R.C. 4906.10(A)(2).
10. Adequate data on the project has been provided to determine that the Facility described in the Application represents the minimum adverse environmental impact, considering the available technology and nature and economics of the various alternatives, and other pertinent considerations as required by R.C. 4906.10(A)(3).

11. Adequate data on the project has been provided to determine that the Facility is consistent with regional plans for expansion of the electric power grid of the electric systems serving this state and interconnected utility systems and that the facility will serve the interests of electric system economy and reliability, as required by R.C. 4906.10(A)(4).
12. Adequate data on the project has been provided to determine that the Facility will either comply with, or is not subject to, the requirements in the R.C. regarding air and water pollution control, withdrawal of waters of the state, solid and hazardous waters, and air navigation, and all regulations thereunder, as required by R.C. 4906.10(A)(5).
13. Adequate data on the project has been provided to determine that the Facility will serve the public interest, convenience, and necessity, as required by R.C. 4906.10(A)(6).
14. Adequate data on the project has been provided to determine what the Facility's impact will be on the viability as agricultural land of any land in an existing agricultural district established under Chapter 929 of the R.C. that is located within the site of the proposed Facility, as required by R.C. 4906.10(A)(7).
15. Adequate data on the project has been provided to determine that the facility incorporates maximum feasible water conservation practices as determined by the Board, considering available technology and the nature and economics of the various alternatives, as required by R.C. 4906.10(A)(8).
16. The record evidence in this matter provides sufficient factual data to enable the Board to make an informed decision.

B. Conclusions of Law

- (1) Juliet Energy Project, LLC is a "person" under R.C. 4906.01(A).
- (2) The proposed Facility is a major utility facility as defined in R.C. 4906.01(B)(1).
- (3) The Application complies with the requirements of O.A.C. Chapter 4906-4.
- (4) The record establishes the nature of the probable environmental impact from construction, operation, and maintenance of the Facility under R.C. 4906.10(A)(2).
- (5) The record establishes that the Facility represents the minimum adverse environmental impact, considering the state of available technology and the nature and economics of the various alternatives, and other pertinent considerations under R.C. 4906.10(A)(3).
- (6) The record establishes, as required by R.C. 4906.10(A)(4), that the Facility is consistent with regional plans for expansion of the electric power grid of the

electric systems serving this state and interconnected utility systems and that the facility will serve the interests of electric system economy and reliability.

- (7) The record establishes, as required by R.C. 4906.10(A)(5), that to the extent that any of them are applicable, construction of the proposed Facility will comply with the requirements in the Ohio Revised Code regarding air and water pollution control, withdrawal of waters of the state, solid and hazardous wastes, and air navigation, and all rules and standards adopted under the relevant Chapters of the Ohio Revised Code.
- (8) The record establishes that the Facility will serve the public interest, convenience, and necessity under R.C. 4906.10(A)(6).
- (9) The Facility's impact on the viability as agricultural land of any land in an existing agricultural district has been determined under R.C. 4906.10(A)(7).
- (10) The record establishes that the Facility incorporates maximum feasible water conservation practices, as determined by the Board, considering available technology and the nature and economics of the various alternatives consistent with R.C. 4906.10(A)(8).
- (11) Based on the record, the Parties recommend that the Board issue a Certificate of Environmental Compatibility and Public Need for construction, operation and maintenance of the Facility which includes the conditions in the Staff Report of Investigation, as presented and modified, by the Joint Stipulation and Recommendation.

The undersigned hereby stipulate and agree and they represent that they are authorized to enter into this Joint Stipulation and Recommendation.

Respectfully submitted on behalf of,

Case No(s). 20-1760-EL-BGN

Summary: Text Joint Stipulation and Recommendation electronically filed by Ms. Megan Zemke on behalf of Borchers, Dylan F
